**Rotordynamics '92** Mar 15 2021 Designers and operators of rotating machinery have to deal with the effects of machine vibration and wear. The increasing demands for quieter machine operation, longer machine life and a greater efficiency of operation have led to the use of sophisticated design aids. Research into rotating machinery is therefore of substantial and increasing importance. Rotordynamics '92 provides a record of some of the most recent research methods and results relating to the design and operation of rotating machinery. The conference is international in character and draws on research from a wide range of respected sources.

**Treaties in Force** Feb 23 2022 *Treaties in Force* is prepared by the Department of State for the purpose of providing information on treaties and other international agreements to which the United States has become a party and which are carried on the records of the Department of State as being in force as of its stated publication date, January 1, 2013. With respect to treaties and agreements in force as of January 1, 2013, information regarding status is up to date as of the date indicated as authoritative. The term "treaty" as a matter of U.S. constitutional law denotes international agreements made by the President with the advice and consent of the Senate in accordance with Article II, section 2 of the Constitution of the United States. In addition to such "treaties", this publication covers international agreements in force that have been concluded by the Executive (a) pursuant to or in accordance with existing legislation or a prior treaty; (b) subject to congressional approval or implementation, and/or (c) under and in accordance with the President's constitutional powers. *Treaties in Force* is arranged in two

sections. Section 1 includes bilateral treaties and other international agreements listed by country or other international entity with subject headings under each entry. Arrangements with territorial possessions of a country appear at the end of the entry for that country. In some cases, treaties and international agreements applicable to a territory prior to its independence are included in the entry for that country on the basis of its assumption of treaty obligations upon becoming independent, as noted at the beginning of the entry for that country. For convenience, some treaties and agreements concluded with countries whose name or statehood status has changed continue to be listed under the name in use at the time the agreement was concluded, if the title of the treaty or agreement has not been formally amended. Section 2 lists multilateral treaties and other international agreements to which the United States is a party, arranged by subject. The depositary is the authoritative source for a current list of parties and information on other matters concerning the status of the agreement, and status information often changes. Information is provided on the depositary for the agreement in question, and contact information, including an Internet site is provided for the depositary where available. *Treaties in Force* Nov 03 2022

**Challenges and Issues with the Further Aging of U.S. Air Force Aircraft** Jun 29 2022 Over the next 20 years, the further aging of already-old aircraft will introduce challenges and issues for aircraft operators. The technical challenges relate to structures, propulsion, and systems. The institutional challenges include limitations on independent verification of fleet status and future condition and on information needed for engineering analyses including risk assessment, and an overall scarcity of resources.
