[EU Citizenship Law and Policy](#) Apr 30 2020 This theoretically ambitious work combines analytical, institutional and critical approaches in  
order to provide an in-depth, panoramic and contextual account of European Union citizenship law and policy.

Introduction to Employee Benefits Law Jan 08 2021 The Fifth Edition of INTRODUCTION TO EMPLOYEE BENEFITS LAW: POLICY AND PRACTICE has been  
updated to reflect the state of federal law as of August 1, 2018. The Fifth Edition features: Revised and updated public policy trends and  
statistics; New developments concerning governmental plans and church plans; Revised and updated discussion of reporting and disclosure  
requirements and estoppel claims; Expanded discussion of nonqualified plans under Code Section 409A; The most recent statutory, regulatory,  
and litigation developments concerning the Affordable Care Act: A revised and updated discussion of retiree health care plans; The most  
recent Supreme Court decisions regarding retiree health care plans, ERISA fiduciary duties, the remedies available to private litigants, and  
ERISA preemption of state laws; and Revised and updated Appendix material concerning the Internal Revenue Service forms used in a typical  
ERISA compliance practice.

Antitrust Law: Policy and Practice Aug 27 2022 This book explores in detail those legal issues that arise in counseling, planning, and  
litigating under the antitrust laws. It is designed to integrate theory and policy issues with doctrine and practice so that students will  
emerge with a fundamental grasp of antitrust doctrine, at least an introduction to the vagaries of antitrust practice, and a sensitivity to  
policy issues undergirding the application and enforcement of the antitrust laws. The Fourth Edition of Antitrust Law: Policy and Practice  
provides close coverage of the application of antitrust doctrine to cutting-edge technologies, the Internet, and to rapidly shifting  
markets. Antitrust Law: Policy and Practice is unique in a number of ways: • The materials are designed to keep the business context of the  
problems in the forefront in order to give theory and doctrine a more solid footing in practical affairs. • The lawyer's role as counselor  
and planner is emphasized throughout. • The business context emphasis is paralleled by another practical emphasis on enforcement and  
procedure. • Several notes, questions, and problems touch on important ethical issues. • The authors include a wide variety of problems,  
designed to satisfy a wide range of teaching objectives and styles, and a wide range of student interests. Some are short and intended to be  
addressed in passing or by brief explanation. Some are longer, intended to occupy a full class hour or more. Some are in serial form, with  
the reader getting additional data as more doctrine is assimilated. And some are review problems that students may find useful to discuss  
among themselves. This eBook features links to Lexis Advance for further legal research options.

[Environmental Justice](#) Nov 06 2020 The environmental justice movement is concerned with the disparate environmental harms and benefits  
experienced by low income communities and communities of color. The selections in the reader provide graduate and undergraduate students  
with an introduction to environmental justice, whether or not they have a background in environmental law.

Patient Safety, Law Policy and Practice Mar 22 2022 The chapters in this book explore the patient safety managerial structures that exist  
in countries where there are developed patient safety infrastructures and cultures. The legal structures of these countries are explored and  
related to major in-country patient safety issues in order to draw comparisons and conclusions on patient safety.

Employment Relations in the United States Mar 10 2021 This book presents an overview of the economic, political and social forces that  
shaped contemporary employment relations practices in the United States.

Routledge Handbook of Water Law and Policy Oct 05 2020 Water plays a key role in addressing the most pressing global challenges of our  
time, including climate change adaptation, food and energy security, environmental sustainability and the promotion of peace and stability.  
This comprehensive handbook explores the pivotal place of law and policy in efforts to ensure that water enables positive responses to these  
challenges and provides a basis for sound governance. The book reveals that significant progress has been made in recent decades to  
strengthen the governance of water resource management at different scales, including helping to address international and sub-national  
conflicts over transboundary water resources. It demonstrates that 'effective' laws and policies are fundamental drivers for the safe,  
equitable and sustainable utilization of water. However, it is also shown that what might constitute an effective law or policy related to  
water resources management is still hotly debated. As such, the handbook provides an important and definitive reference text for all  
studying water governance and management.

Outer Space Law Aug 23 2019 The potential use of space for military purposes has, since the end of the Second World War, been intrinsically  
linked to the development of space technology and space flight. The political relevance of outer space continues to be recognised by  
nations, particularly the strategic benefit of Earth observation from outer space as a national security tool. However, the dual-use  
potential of many space applications increasingly blurs the distinction between the military and non-military uses of space. In fact, many  
States have openly declared their willingness to protect their space assets by military means and some have even described outer space as a  
war-fighting domain. Non-State entities are becoming more and more involved in outer space activities, including the use of satellites for  
navigation purposes, the transportation of supplies to the International Space Station and the offering of tourist flights into outer space.  
Private operators have significantly increased activity in the launch of satellites and in 2021 no less than three private space companies  
(Virgin Galactic, Blue Origin and SpaceX) conducted successful space tourist flights. Today in all space-faring countries, the space  
industry contributes to national GDP and supports the labour force. It also serves as a catalyst for technological advancement and  
productivity growth, and has become an integral part of the day-to-day lives of people around the world. Consequently, the socio-economic  
benefits of space technology (in particular satellite technology) have made the development of space programmes an increasing necessity for  
developing States. Outer space has become a congested environment. The involvement of private actors, specifically, has given rise to a  
number of legal issues, including questions pertaining to liability, insurance, space debris, human rights and property rights in space. To  
address these legal uncertainties, the existing chapters in the second edition of Outer Space Law: Legal Policy and Practice have been  
updated significantly and several new chapters have been added dealing with topical issues including: the regulation of satellite navigation  
systems, and satellite constellations; the application of human rights in outer space settlements; the exploration and colonisation of outer  
space; and planetary protection. The second edition of Outer Space Law: Legal Policy and Practice remains aimed at readers looking for a  
single title to understand the key issues relevant to the space sector, by also emphasising the practical application of those issues. The  
book will be specifically relevant to legal practitioners, academics and State departments primarily working in the space arena, as well as  
to those in other related sectors such as IT and media, insurance and political science. Edited by Yanal Abul Failat, lawyer at the  
international law firm Fasken, and Professor Anél Ferreira-Snyman, a professor of law specialising in international space law at the  
University of South Africa, the book includes contributions by leading experts from space agencies, space venturers, lawyers, economists,  
insurers, academics and financiers.

[Law, Policy and the Internet](#) Apr 11 2021 This comprehensive textbook by the editor of Law and the Internet seeks to provide students,  
practitioners and businesses with an up-to-date and accessible account of the key issues in internet law and policy from a European and UK

perspective. The internet has advanced in the last 20 years from an esoteric interest to a vital and unavoidable part of modern work, rest and play. As such, an account of how the internet and its users are regulated is vital for everyone concerned with the modern information society. This book also addresses the fact that internet regulation is not just a matter of law but increasingly intermixed with technology, economics and politics. Policy developments are closely analysed as an intrinsic part of modern governance. Law, Policy and the Internet focuses on two key areas: e-commerce, including the role and responsibilities of online intermediaries such as Google, Facebook and Uber; and privacy, data protection and online crime. In particular there is detailed up-to-date coverage of the crucially important General Data Protection Regulation which came into force in May 2018.

The Development of Child Protection Law and Policy Aug 15 2021 This book examines how child protection law has been shaped by the transition to late modernity and how it copes with the ever-changing concepts of risk. The book traces the evolution of the contemporary child protection system through historical changes, assessing the factors that have influenced the development of legal responses to abuse over a 130-year period. It does so by focussing on the Republic of Ireland where child protection has become emblematic of wider social change. The work draws on a wide range of primary and secondary sources including legislation, case law and official and media reports of child protection inquiries. It also utilises insights developed through an extensive examination of parliamentary debates on child protection matters. These materials are assessed through the lens of critical discourse analysis to explore the relationship between law, social policy and social theory as they effect child protection. While the book utilises primarily Irish sources, this multidisciplinary approach ensures the argument has international applicability. The book will be a valuable resource for all those with an interest in the development of child protection law.

Law, Policy and International Justice Feb 21 2022 Written by distinguished scholars from Canada and abroad, the essays cover topics in four different fields that reflect some of Cohen's principal academic interests and concerns: international law, public law, legal history, and legal education. From discussion of the development of United Nations law in the recent Gulf Conflict, the International Court of Justice, and the Cohen Committee on Hate Propaganda, to habeas corpus and legal education, the essays break new ground and demonstrably add, as Maxwell Cohen has done, to knowledge in their respective fields. The collection contains a preface by former Chief Justice Brian Dickson and essays by Anne Bayefsky, William Black, Irwin Cotler, Dale Gibson, Annemieke Holthuis, Julius Grey, William Kaplan, Louis Knafka, David McDonald, Roderick Macdonald, J.P.S. McLaren, Donald McRae, Edward McWhinney, Donat Pharand, Shabtai Rosenne, Oscar Schachter, Robert Sharpe, and William Stevenson. Maxwell Cohen was a former Dean of Law at McGill University. He is currently Scholar-in-Residence at the University of Ottawa.

Tax Compliance as the Result of a Psychological Tax Contract Jun 13 2021

Coercive Care Feb 09 2021 There has been much debate about mental health law reform and mental capacity legislation in recent years with the UN Convention on the Rights of Persons with Disabilities also having a major impact on thinking about the issue. This edited volume explores the concept of 'coercive care' in relation to individuals such as those with severe mental illnesses, those with intellectual and cognitive disabilities and those with substance use problems. With a focus on choice and capacity the book explores the impact of and challenges posed by the provision of care in an involuntary environment. The contributors to the book look at mental health, capacity and vulnerable adult's care as well as the law related to those areas. The book is split into four parts which cover: human rights and coercive care; legal capacity and coercive care; the legal coordination of coercive care and coercive care and individuals with cognitive impairments. The book covers new ground by exploring issues arising from the coercion of persons with various disabilities and vulnerabilities, helping to illustrate how the capacity to provide consent to treatment and care is impaired by reason of their condition.

Making Policy, Making Law Jan 28 2020 This volume proposes a new way of understanding the policymaking process in the United States by examining the complex interactions among the three branches of government, executive, legislative, and judicial. Collectively across the chapters a central theme emerges, that the U.S. Constitution has created a policymaking process characterized by ongoing interaction among competing institutions with overlapping responsibilities and different constituencies, one in which no branch plays a single static part. At different times and under various conditions, all governing institutions have a distinct role in making policy, as well as in enforcing and legitimizing it. This concept overthrows the classic theories of the separation of powers and of policymaking and implementation (specifically the principal-agent theory, in which Congress and the presidency are the principals who create laws, and the bureaucracy and the courts are the agents who implement the laws, if they are constitutional). The book opens by introducing the concept of adversarial legalism, which proposes that the American mindset of frequent legal challenges to legislation by political opponents and special interests creates a policymaking process different from and more complicated than other parliamentary democracies. The chapters then examine in depth the dynamics among the branches, primarily at the national level but also considering state and local policymaking. Originally conceived of as a textbook, because no book exists that looks at the interplay of all three branches, it should also have significant impact on scholarship about national lawmaking, national politics, and constitutional law. Intro., conclusion, and Dodd's review all give good summaries.

The Politics of Adoption Aug 03 2020 This book analyses the social and legal functions of adoption in selected societies worldwide, and reviews the current global wave of adoption law reform. The author explores trends such as inter-country adoption, and examines similarities and differences in the experience of many nations. The book also provides a window for testing the presumption that within and between cultures there exists a common understanding of what is meant by adoption.

Law and Policy for the Quantum Age Jul 02 2020 The Quantum Age cuts through the hype to demystify quantum technologies, their development paths, and the policy issues they raise.

The Eu and the Global Protection of Children's Rights Nov 25 2019 This edited collection critiques, from an interdisciplinary perspective, the growing body of EU children's rights activities in the light of broader global political, economic and legal processes. It scrutinises the compatibility of EU children's rights measures with the principles and provisions enshrined in the UN Convention on the Rights of the Child (CRC). The broad focus of the book is twofold: on the one hand, it aims to explore how EU actions in children's rights have an impact on the global protection of children's rights and, on the other hand, to scrutinise how international and global processes shape EU policies on children's rights. The collection scrutinises the effectiveness and impact of the EU's role in advancing children's rights (in terms of norms, laws, policy measures) from inter-disciplinary perspectives by drawing on conceptual tools and analytical frameworks from political science, law, childhood studies and sociology. From the Contents: \* Children's rights, EU enlargement policy and economic crisis \* The EU and Child Protection Systems: the role and added value of the EU in advancing children's protection rights \* Cross-border cooperation and child victim protection \* The role of Civil Society in supporting the EU children's rights agenda \* Achieving child participation at EU level The Editors: Prof Helen Stafford, Founding director of the European Children's Rights Unit (ECRU), Professor at the School of Law & Social Justice, University of Liverpool, UK Ingi lusmen, PhD, Research Fellow at the Department of Politics, University of Sheffield, UK

Environmental Law, Policy, and Economics Apr 23 2022 The nature and origins of environmental contamination -- Nature and assessment of the harm -- Economics and the environment -- Addressing pollution through the tort system -- Administrative law: the roles of Congress, the president, the agencies, and the courts in shaping environmental policy -- The Clean Air Act and the regulation of stationary sources -- The regulation of mobile sources under the Clean Air Act -- Protection of surface waters, wetlands, and drinking water: the Clean Water Act and Safe Drinking Water Act -- Regulation of hazardous wastes: RCRA, CERCLA, and hazardous waste facility siting -- The right to know: mandatory disclosure of information regarding chemical risks -- Enforcement: encouraging compliance with environmental statutes -- Alternative forms of government intervention to promote pollution reduction -- Policies to promote pollution prevention and inherent safety -- Epilogue -- beyond pollution control and prevention: sustainable development.

International Environmental Law, Policy, and Ethics Oct 25 2019 This text investigates the ethical and political justifications for the international legal regime protecting the environment, and analyses in detail the myriad challenges these justifications can face.

Understanding Common Law Legislation Jun 25 2022 Many countries use and apply the common law. The common law world largely operates through statutes enacted by a country's democratic legislature. These statutes are drafted and interpreted according to a uniform system of rules, presumptions, principles and canons evolved over centuries by common law judges. In this book, Francis Bennion distills forty years of his prolific writings on statute law and statutory interpretation to provide valuable guidance on statutory interpretation applicable to all common law jurisdictions.

International Trade & Business Law & Policy Sep 23 2019 First published in 1998. Routledge is an imprint of Taylor & Francis, an informa company.

Clinical Guidelines Jun 01 2020 In a society where a comic equates with knockabout amusement for children, the sudden pre-eminence of adult comics, on everything from political satire to erotic fantasy, has predictably attracted an enormous amount of attention. Adult comics are part of the cultural landscape in a way that would have been unimaginable a decade ago. In this first survey of its kind, Roger Sabin traces the history of comics for older readers from the end of the nineteenth century to the present. He takes in the pioneering titles pre-First World War, the underground 'comix' of the 1960s and 1970s, 'fandom' in the 1970s and 1980s, and the boom of the 1980s and 1990s (including 'graphic novels' and Viz.). Covering comics from the United States, Europe and Japan, Adult Comics addresses such issues as the graphic novel in context, cultural overspill and the role of women. By taking a broad sweep, Sabin demonstrates that the widely-held notion that

comics 'grew up' in the late 1980s is a mistaken one, largely invented by the media. Adult Comics: An Introduction is intended primarily for student use, but is written with the comic enthusiast very much in mind.

**Climate Change and Sustainable Development** Sep 28 2022 With the profile of environmental issues at an all-time high, this book provides a much needed examination of the related effects of these issues on the property industry. Within the property industry at the moment it is difficult to assume an overview of these issues, and to properly assess the implications of climate change for commercial property. This is the first book that pulls together the different elements of climate change into one coherent argument, explaining what needs to be done to ensure the future of the property market. The main issues discussed are: mitigation, adaptation, energy efficiency and property valuation, in addition to providing informed commentary on the laws and practical guidance to practitioners.

**Research Handbook on EU Media Law and Policy** Jul 22 2019 This cutting-edge Research Handbook presents a comprehensive overview of the European Union's influence on the regulation of the media sector in the digital age. It explores and compares several areas of European legislation that have an impact on the media sector, defined in a broad sense for its capacity to influence the public opinion at large.

**Migration Law, Policy and Human Rights** Sep 16 2021 This book analyses the law and policy of migration in the European Union (EU) and its relationship to understandings of the EU as an international human rights actor.

**Endangered Species Act** May 24 2022 "As Secretary of the Interior, implementing the Endangered Species Act was one of my most important, and challenging, responsibilities. All who deal with this complex and critical law need a clear and comprehensive guide to its provisions, interpretation, and implementation. With chapters written by some of the foremost practitioners in the field, the new edition of Endangered Species Act: Law, Policy, and Perspectives is an essential reference for conservationists and the regulated community and the attorneys who represent them."---Bruce Babbitt, former Secretary of the Interior "In January 1973, when I introduced in Congress the bill that would become the Endangered Species Act, I described it as one of the most important pieces of legislation needed if we were to conserve, protect, and propagate our threatened fish and our wildlife resources, which were diminishing too rapidly. I am proud to have introduced the original bill and even prouder that, in the ensuing years, the Endangered Species Act has saved hundreds of species from extinction. We have learned much along the way about the conservation of endangered species, the needs of the regulated community, and how the Endangered Species Act can successfully reconcile the two. It is important that we have a comprehensive understanding of the problems and potential of this landmark law."---John D. Dingell, U.S. House of Representatives, Michigan "Possibly the single most effective legislative effort of modern times to ensure that our children and grandchildren can enjoy the blessings of nature that were passed on to our generation was the enactment of the landmark Endangered Species Act (ESA) in 1973. The ESA has allowed the United States to make great advances in protecting the web of life that enables the intricate coexistence of man, plant, and animal. In my role as Chairman of the House Committee on Natural Resources, I recognize the role of the Endangered Species Act in helping us to fulfill our stewardship responsibilities while balancing local concerns and economic needs. Understanding how the ESA works is essential to its continued success."---Nick J. Rahall, II, U.S. House of Representatives, West Virginia "After a lifetime of studying, writing about, and being amazed by the diversity of life, I remain convinced that failing to do everything we can to protect it is the folly future generations are least likely to forgive us. The Endangered Species Act is one of the most far-sighted and important laws ever adopted. A thorough understanding of how the law works, the major policy issues surrounding it, and how to resolve those issues will ensure the law's continued success in protecting biodiversity. Endangered Species Act: Law, Policy, and Perspectives provides readers with the needed insight to this critically important law."---Edward O. Wilson, University Research Professor Emeritus at Harvard University and Honorary Curator in Entomology at the Museum of Comparative Zoology

**Law and Public Policy** Oct 29 2022 Laws exist to incentivize us to act in a certain manner, in accordance with the policies that our community has deemed right for us. And when we disagree with those laws, we must re-examine our policies, and thus our beliefs and ideas, to decide whether our community has changed. This is a book about law and public policy—about the ideas and the rules we build to implement those rules. While similar books have looked at public policy and public administration in an effort to explain how the government works, and others have considered the foundations of the legal system to understand the rulemaking institutions, this book takes a different approach. In this ground-breaking new textbook, author Kevin Fandl develops a complete picture of society, from idea to action -- by examining laws through the lens of policy, and vice versa. This holistic approach gives readers a chance to see not only why certain rules exist, but how those rules evolved over time and the events that inspired them. It offers readers an opportunity not only to see but also to participate in the process of forming the structures that shape our society. This textbook is divided into two sections. The first section provides readers with the tools that they will need to digest the policies and laws that surround them. These tools include a historical deep dive into the foundations of the governance structure in the United States and beyond, an important examination of civics and a reminder of the importance of engaging in the policymaking process, a careful breakdown of the institutions that form the backbone of the law and policy-making institutions in the United States, and finally critical thinking including practical tools to find reliable sources for news, research, and other types of information. The second section of the text is comprised of subject-matter analyses. These subject-based chapters, written by experts on the topic at hand begin with a historical perspective, followed by a careful examination of the key policies and laws that inform that field. Each chapter highlights key vocabulary, provides practical vignettes to add context to the writing, explores a unique global component to compare perspectives from communities worldwide, and includes a number of discussion questions and recommended readings for further examination. This textbook is tailored specifically for undergraduate and graduate students of public policy, to introduce them to the role of law and legal institutions as facilitators and constraints on public policy, exploring those laws in a range of relevant policy contexts with the help of short case studies.

**Pensions** Dec 07 2020 State pensions are the largest item in the UK social security budget, costing £96.7 billion in 2017/18. In the same year, 45.6 million people were members of UK occupational pension schemes (out of a total population of 66.4 million) and the total amount saved into workplace schemes in 2018 was £90.4 billion. A consequence of the pensions sector's large size has been that pensions law and social security law have become increasingly specialised areas of practice. Yet despite their social and economic importance and the fascinating legal issues they generate, pensions have not been the subject of sustained academic attention. This book starts to fill this gap by initiating a dialogue between practitioners and scholars working on pensions law and policy, groups who have much to learn from one another.

**Transformative Law and Public Policy** Jul 26 2022 This book explores the convergence of law and public policy. Drawing on case studies from Asia, Europe, the Middle East and Australia, it examines how judicial and political institutions are closely linked to the socio-economic concerns of the citizens. The essays argue for the utilization of both legislative and executive, private and public spheres of society as vehicles for transformative social change and to safeguard against violations of socio-economic rights. The volume will be of great interest to both public and private stakeholders, as well as professionals, including NGOs and think tanks, working in the areas of law, government, and public policy. It will also be immensely useful to academics and researchers of constitutionalism, policymaking and policy integration, social justice and minority rights.

**Competition Law and Policy in the EU and UK** Dec 27 2019 Competition Law and Policy in the EU and UK provides a focused guide to the main provisions and policies at issue in the EU and UK, including topics such as enforcement, abuse of dominance, anti-competitive agreements, cartels, mergers, and market investigations. The book's contents are tailored to cover all major topics in competition law teaching, and the authors' clear and accessible writing style offers an engaging and easy to follow overview of the subject for course use. The fifth edition provides a full update for this well-established title, presenting and contextualising the impact of key cases, as well as changes to enforcement practice, and at a legislative and institutional level. There are new, separate chapters in this edition on private enforcement and UK market investigations to reflect the increasing significance of these key areas of competition law practice. Competition Law and Policy in the EU and UK integrates useful pedagogical features to help clarify topics and reinforce important points: chapter overviews and summaries highlight the key points to take away from each chapter to structure student learning discussion questions facilitate self-testing and seminar discussions of the major issues covered in each chapter, to help reinforce understanding of these topics further reading lists additional resources in order to guide research and develop subject knowledge a new glossary provides succinct explanations of competition law terminology, ideal for those studying the topic for the first time Clear, focused and student-friendly, this title offers a comprehensive resource for students taking competition law courses, and is supported online by updates to the law offered on Angus MacCulloch's blog, Who's Competing (<http://whoscompeting.wordpress.com/>).

**The Politics of Adoption** Nov 18 2021 This book, which updates and expands the third edition published by Springer in 2015, explains, compares and evaluates the social and legal functions of adoption within a range of selected jurisdictions and on an international basis. From the standpoint of the development of adoption in England & Wales, and the changes currently taking place there, it considers the process as it has evolved in other countries. It also identifies themes of commonality and difference in the experience of adoption in a common law context, comparing and contrasting this with the experience under civil law and in Islamic countries and with that of indigenous people. This book includes new chapters examining adoption in Russia, Korea and Romania. Further, it uses the international conventions and the associated ECtHR case law to benchmark developments in national law, policy and practice and to facilitate a cross-cultural comparative analysis.

**Fundamentals of Space Law and Policy** May 12 2021 Presents and addresses key space law and policy issues for the benefit of wider informed

audiences that wish to acquaint themselves with the fundamentals of the space law field. This brief analyzes in a concise manner the combined influence of space law and policy on international space activities. Read in conjunction with the other books in the Springer 'Space Development' series, it supports a broader understanding of the business, economics, engineering, legal, and procedural aspects of space activities. This book will also give the casual reader as well as experts in the field insight on present and future space law and policy trends, challenges and opportunities.

The Global Energy Transition Sep 04 2020 Introduction / Peter Cameron, Xiaoyi Mu and Volker Röben -- Comparison of outlooks and implications for an energy transition / Xiaoyi Mu and Dilip K Jena -- Oil-rich countries' responses to energy transition : managing the decline / David Manley, Patrick Heller, and James Cust -- A treatise for energy law / Raphael J Heffron, Anita Rønne, Joseph P Tomain, Adrian Bradbrook, and Kim Talus -- What do we mean when we talk about international energy law? / Volker Röben and Gökçe Mete -- The legal effect of the Paris rulebook under the doctrine of treaty interpretation / Petra Minnerop -- How will energy market regulation have to change in the era of energy 4.0? / Penelope Crossley -- Between transnational private law and public international law : engineer-driven self-governance in transboundary energy megaprojects / Christoph G Benedict -- Managing the threat of regulatory capture under the European Energy Union / Rafael Emmanuel Macatangay and Volker Röben -- Power over power : the global energy interconnection and potential cyber-threats / Jakob Haerting -- Implementing the energy transition in the face of investment protection standards / Martin Jarrett -- The EU FDI screening regulation as an example of the proliferation of FDI screening processes affecting the energy sector / Leonie Reins and Dylan Geraets -- International arbitration in the renewable field : recent developments in Spain / Inigo del Guayo -- How should shale gas extraction be taxed? / Philip Daniel, Alan Krupnick, Thornton Matheson, Peter Mullins, Ian Parry, and Artur Swistak -- Trinidad and Tobago's Oil and gas sector in a changing world (2010-2019) / Kevin Ramnarine -- The concept of global energy transition and its agenda / Peter Cameron, Xiaoyi Mu, and Volker Röben.

Public Prosecutions in Australia Dec 19 2021

The Law and Policy of Biofuels Jan 20 2022 In the last twenty years the biofuels industry has developed rapidly in many regions of the world. This book provides an in-depth and critical study of the law and policies in many of the key biofuels producing countries, such as Brazil, China, the US, as well as the EU, and a number of other countries where this industry is quickly developing. The multidisciplinary contributors examine the roles of the public and private sectors in the governance of biofuels. They propose recommendations for more effective and efficient biofuel policies.

The Law and Policy of the World Trade Organization Jun 20 2019 This is primarily a textbook for graduate and upper-level undergraduate students of law. However, practising lawyers and policy-makers who are looking for an introduction to WTO law will also find it invaluable. The book covers both the institutional and substantive law of the WTO. While the treatment of the law is often quite detailed, the main aim of this textbook is to make clear the basic principles and underlying logic of WTO law and the world trading system. Each section contains questions and assignments, to allow students to assess their understanding and develop useful practical skills. At the end of each chapter there is a helpful summary, as well as an exercise on specific, true-to-life international trade problems.

Arbitration Mar 30 2020

Driving Offences Feb 27 2020 This volume examines general driving offences, concentrating on those which punish risk-taking whilst driving, with the primary goal of increasing road safety. The focus is particularly on careless driving, dangerous driving, drink-driving and speeding, with a comparative approach incorporated into the discussion. Drawing on legal and psychological research, the book explains the legal definition of offences, discussing the policy behind the offences and examines how the law is applied in practice. It concludes with consideration of how the law in this area might be reformed - informed by the preceding discussion. This title will be a valuable resource tool for students, academics and practitioners working in the area of road safety.

Environmental Law and Policy in India Jul 14 2021 Environmental law and policy in India affects all sections of society. Those most deeply affected by it are the poor. They are the first victims of poor sanitation, polluted air, and contaminated water. Since the 1970s, efforts to protect environmental quality have met with limited success, posing enduring challenges for policy designers and decision-makers entrusted with protecting and preserving natural resources. This edition of Environmental Law and Policy retains the familiar analytical structure of the second edition and includes all major developments since then. It focuses on Indian environmental law, policies, problems, and needs with the comprehensiveness of an American law case book, compiles all the leading cases in environmental law in India with concise extracts of landmark judgments and policy documents, and provides discussions on projects which could potentially degrade the environment. This volume also covers air and water pollution, forests, wildlife, noise pollution, common property resources and tribal communities, environmental impact assessment, coastal regulations, large projects, urban problems, the National Green Tribunal, hazardous substances, transnational environmental policies, and international environment law. It is interlaced with notes, comments, and questions intended to encourage critical thinking amongst lawyers and law students.
