[Law and the Arts](#) Sep 02 2022 This interdisciplinary study examines the relationships between law and the humanities. On the one side, chapters focus attention on legal restraints in the media, censorship of the arts, copyright protection on the Internet, and artists' rights in the past and in the present cyberspace era. On the other, the role played by law in literature and the theatre is explored, and one essay examines the architectural design of the U.S. Supreme Court and how its architect fit into political history.

[American Traditions in Watercolor](#) May 30 2022 Shows more than sixty watercolors by various American artists, describes the background of each work, and discusses the technique of Homer and Sargent

[Performance and Spanish film](#) Apr 16 2021 Performance and Spanish film is the first book to provide a detailed study of screen acting in Spanish film. With fifteen original essays by leading scholars of Spanish film, the book casts light on the manifold meanings, methods and influences of Spanish screen performance, from the silent era to the present day. In doing so, the book provides bold new readings of the work of significant Spanish actors and filmmakers, from Javier Bardem, Penélope Cruz and Alfredo Landa, to Pedro Almodóvar, Carlos Saura and Alejandro Amenábar. The fine-grained study of acting in each chapter also provides a means of exploring broader questions surrounding Spanish film practices, culture and society. Performance and Spanish film will be essential reading for both students and scholars of Spanish film alike, as well as to those more broadly interested in the history of screen acting.

[Mother Goose](#) Mar 28 2022 Children, as well as their interested parents, will eagerly welcome this beautiful edition of the one great nursery classic, just as a worthy edition of Shakespeare is welcomed by discriminating adult readers. But some may ask what there is in these simple melodies, attributed to Mother Goose, which gives them so secure and beloved a place in the home, the school and the public library. Is it the humor, the action, the rhythm, or the mystery of the theme which appeals so strongly to critical little minds in each generation of childhood, and even to adult minds so fortunate as to have retained some of the refreshing naivete of early years? It is useless to try to explain the charm of these nonsense melodies. The children themselves do not know why they love them. No mother can tell us the magic of the spell which seems to be cast over her restless baby as she croons to it a Mother Goose lullaby. No primary teacher quite understands why the mere repetition or singing of a Mother Goose jingle will transform her listless, inattentive class into one all eagerness and attention. But mother and teacher agree that the best of these verses have an even more potent influence than that of innocently diverting and entertaining the child. The healthy moral, so subtly suggested in many of the rhymes, is unconsciously absorbed by the child's receptive mind, helping him to make his own distinction between right and wrong, bravery and cowardice, generosity and selfishness. From a literary standpoint, also, these rhymes have proved of real value in creating a taste for the truly musical in poetry and song. They train the ear and stir the imagination of the child as no other verses do. Many famous poets and writers trace their first inspiration, and love for things literary, back to the nursery songs and fairy tales of their childhood. Teachers well know that children who have reveled in these rhymes and stories, at the time of their strongest appeal, step naturally and appreciatively into the great fields of good literature which are beyond. Knowing these things to be true, we do not hesitate to place this venerable classic on the shelf beside our Shakespeare, and to send our children there for delight and inspiration. They will understand Shakespeare the better for having known and loved Mother Goose. But what about the personality of this classic writer? Was she really Mistress Elizabeth Goose who is said to have lived in Boston about two hundred years ago, and who crooned her nonsense jingles to a large and happy family of grandchildren? We are told that their father, Thomas Fleet, who was a printer by trade, thought to turn an honest penny with his mother-in-law's popular verses, so he published them in a small volume under the title of "Songs for the Nursery: or, Mother Goose's Melodies." A goose with a very long neck and a wide-open mouth flew across the title page, at least so the story goes. But we have to believe that it is only a story, for no copy of the book can be found, and nothing but tradition identifies Elizabeth Goose, the Boston grandmother, with the famous rhymester."

[Secondary Analysis of the TIMSS Data](#) Feb 12 2021 The goal of this volume is to use the data from IEA's Third International Mathematics and Science Study (TIMSS) to investigate significant questions related to mathematics and science education as well as a number of methodological issues. The authors of the papers included in this collection come from eleven of the TIMSS countries, and they are prominent in their respective fields. The book will be of interest to readers interested in comparative education, mathematics and science education, curriculum, and survey research methodology. A study such as TIMSS costs a great deal of money to carry out; and, if the true value of that investment is to be realized, much more research of the kind reported in this collection is needed. The papers included provide insights into the impact that TIMSS has had in the participating countries. They also serve as excellent examples of the kind of follow-up research that is needed.

[Making Europe](#) May 06 2020 Designed for students without a strong background in history, Making Europe is organized around a political chronology to help inexperienced students get a sense of the story of western civilization. Themes of religion, social history, biography and personality, and individual and collective identity enable students to grasp the "big picture." The text's attention to Eastern Europe and thorough coverage of religious history extends right up to the present. The authors' collective experience teaching Western Civilization is evident in the text's carefully designed system of pedagogy that promotes understanding of events and figures of the western past. Focus and review questions, chronologies, key terms and definitions, and chapter summaries help students engage with the material step-by-step, chapter-by-chapter.

[Defining the Sacred](#) Oct 11 2020 Religion is a phenomenon that is inseparable from human society. It brings about a set of emotional, ideological and practical elements that are pervasive in the social fabric of any society and characterizable by a number of features. These include the establishment of intermediaries in the relationship between humans and the divine; the construction of ceremonial places for worshipping the gods and practicing ritual performances; and the creation ritual paraphernalia. Investigating the religious dimensions of ancient societies encounters problems in defining such elements, especially with regard to societies that lack textual evidences and has tended to lead towards the identification of differentiation between the mental dimension, related to religious beliefs, and the material one associated with religious practices, resulting in a separation between scholars able to investigate, and possibly reconstruct, ritual practices (i.e., archaeologists), and those interested in defining the realm of ancient beliefs (i.e., philologists and religious historians). The aim of this collection of papers is to attempt to bridge these two dimensions by breaking down existing boundaries in order to form a more comprehensive vision of religion among ancient Near Eastern societies. This approach requires that a higher consideration be given to those elements (either artificial -- buildings, objects, texts, etc. -- or natural -- landscapes, animals, trees, etc.) that are created through a materialization of religious beliefs and practices enacted by members of communities. These issues are addressed in a series of specific case-studies covering a broad chronological framework that from the Pre-pottery Neolithic to the Iron Age. [Christian Imperialism](#) Feb 01 2020 In 1812, eight American missionaries, under the direction of the recently formed American Board of Commissioners for Foreign Missions, sailed from the United States to South Asia. The plans that motivated their voyage were no less grand than taking part in the Protestant conversion of the entire world. Over the next several decades, these men and women were joined by hundreds more American missionaries at stations all over the globe. Emily Conroy-Krutz shows the surprising extent of the early missionary impulse and demonstrates that American evangelical Protestants of the early nineteenth century were motivated by Christian imperialism—an understanding of international relations that asserted the duty of supposedly Christian nations, such as the United States and Britain, to use their colonial and commercial power to spread Christianity. In describing how American missionaries interacted with a range of foreign locations (including India, Liberia, the Middle East, the Pacific Islands, North America, and Singapore) and imperial contexts, Christian Imperialism provides a new perspective on how Americans thought of their country's role in the world. While in the early republican period many were engaged in territorial expansion in the west, missionary supporters looked east and across the seas toward Africa, Asia, and the Pacific. Conroy-Krutz's history of the mission movement reveals that strong Anglo-American and global connections persisted through the early republic. Considering Britain and its empire to be models for their work, the missionaries of the American Board attempted to convert the globe into the image of Anglo-American civilization.

Hegel's Aesthetics Jul 20 2021 Hegel is known as "the father of art history," yet recent scholarship has overlooked his contributions. This is the first comprehensive interpretation of Hegel's philosophy of art in English in thirty years. In a new analysis of Hegel's notorious "end of art" thesis, Hegel's Aesthetics shows the indispensability of Hegel's aesthetics for understanding his philosophical idealism and introduces a new claim about his account of aesthetic experience. In a departure from previous interpretations, Lydia Moland argues for considering Hegel's discussion of individual arts--architecture, sculpture, painting, music, and poetry--on their own terms, unlocking new insights about his theories of perception, feeling, selfhood, and freedom. This new approach allows Hegel's philosophy to engage with modern aesthetic theories and opens new possibilities for applying Hegel's aesthetics to contemporary art. Moland further elucidates his controversial analysis of symbolic, classical, and romantic art through clarifying Hegel's examples of each. By incorporating newly available sources from Hegel's lectures on art, this book widely expands our understanding of the particular artworks Hegel discusses as well as the theories he rejects. Hegel's Aesthetics further situates his arguments in the intense philosophizing about art among his contemporaries, including Kant, Lessing, Herder, Schelling, and the Schlegel brothers. Ultimately, the book offers a rich vision of the foundation of his ideas about art and the range of their application, confirming Hegel as one of the most important theorists of art in the history of philosophy.

The Star Country Jan 02 2020 An "agreeable debut novel" of a fragmented US and first alien contact from the Twilight Zone and Z Nation TV writer (Kirkus Reviews). In the near future, war has torn the United States apart. Small communities barely scrape by amidst climate change and economic collapse. Powerful nation-states struggle over whatever resources remain--technology in California, money in Chicago, oil in Texas. Some small hope has arrived in the form of the Hocq, a group of aliens on a mission to bring their advanced knowledge to Earth. But, as hostile governments across the globe vie for that knowledge, a Hocq named Harrek defects into outlaw territory. Diplomacy seems to have failed, and he can't allow the wrong nation to gain such a huge advantage over the others. Now it's up to Lisa Marquez, the human who helped Harrek escape, and Jeremy Clayton, a poor outland farmer, to keep the alien safe from the military and outlaws. The clock is counting down, and Harrek needs to get the Genesis File into the right hands before he gets found by the humans...or the other Hocq. In Michael Cassutt's first novel, the author takes standard SF story situations--post-holocaust tribal human struggles, first alien contact--blends them together and brings his own uniquely original spin to a tried-and-true setting.

The Folkungs Sep 09 2020 Based on 14th Century Scandinavian actual events, The Folkungs--Sweden's royal family--is a generational saga interwoven with jealousy, conspiracy, rivalry, treason, regicide, exorcism, paganism, torture, witchcraft, shamanism, Falconry, folklore, power struggles, and deeply touching love stories. It begins at Nykoping Castle, Sweden, 1291. King Magnus is dead and his three young sons--Birger who is now king, Erik, and Valdemar --await the arrival of the appointed Regent of Sweden, a powerful noble and celebrated warrior, who will teach them the arts of governing, knighthood and skills of war until the young king comes of age. Under his tutelage, Erik will show himself to be the most intelligent and skilful of the three; Valdemar, the youngest, will look on in admiration, while the fledgling King, will bridle with insecurity. Arriving with the Regent is his young daughter, Kristina, who stares aghast at the royal fortress rising before her like a grim symbol of doom. Her fear is well founded: here wastes away a King usurped and imprisoned by his brother, where the future holds even darker treachery. As the young princes mature, King Birger proves himself to be increasingly weak and manipulated by the self-seeking Regent. Can Sweden be left prey to his inept rule? Alliances are formed across the borders as the royals start taking sides. Along with Scandinavia's folklore, magic and myths, the author's words are brought to life across the snowy landscapes, light summer nights, and medieval castles of Scandinavia.

The Classical Art of Command Aug 21 2021 This book examines the many facets of Greek leadership during the Classical Age through the unique perspective of eight generals regarded as outstanding shapers of Greek military history. The work also draws attention to the important role that the general's personality played in his command.

Gauguin Jun 30 2022 An unprecedented exploration of Gauguin's works in various media, from works on paper to clay and furniture Paul Gauguin (1848-1903) was a creative force above and beyond his legendary work as a painter. Surveying the full scope of his career--spanning experiments in different media and formats--clay, works on paper, wood, and paint, as well as furniture and decorative friezes--this volume delves into his enduring interest in craft and applied arts, reflecting on their significance to his creative process. Gauguin: Artist as Alchemist draws on extensive new research into the artist's working methods, presenting him as a consummate craftsman--one whose transmutations of the ordinary yielded new and remarkable forms. Beautifully designed and illustrated, this book includes essays by an international team of scholars who offer a rich analysis of Gauguin's oeuvre beyond painting. By embracing other art forms, which offered fewer dominant models to guide his work, Gauguin freed himself from the burden of artistic precedent. In turn, these groundbreaking creative forays, especially in ceramics, gave new direction to his paintings. The authors' insightful emphasis on craftsmanship deepens our understanding of Gauguin's considerable achievements as a painter, draftsman, sculptor, ceramist, and printmaker within the history of modern art.

The Laser Inventor Jan 14 2021 In these engaging memoirs of a maverick, Theodore H. Maiman describes the life events leading to his invention of the laser in 1960. Maiman succeeded using his expertise in physics and engineering along with an ingenious and elegant design not anticipated by others. His pink ruby laser produced mankind's first-ever coherent light and has provided transformational technology for commerce, industry, telecom, the Internet, medicine, and all the sciences. Maiman also chronicles the resistance from his employer and the ongoing intrigue by competing researchers in industry and academia seeking to diminish his contribution in inventing the first laser. This work will appeal to a wide readership, from physicists and engineers through science enthusiasts to general readers. The volume includes extensive photos and documentary materials related to Maiman's life and accomplishments never before published. "No one beat Maiman to the laser. How important is the laser? How important are all lasers? That is how important we have to regard Maiman's contribution. He and the laser changed all of our lives, everyone's!" Dr. Nick Holonyak, Jr., Professor of Electrical and Computer Engineering and Physics, University of Illinois at Champaign-Urbana, and inventor of the light-emitting diode (LED) and co-inventor of the transistor laser "More than five decades later, we can safely conclude that Theodore Maiman's groundbreaking discovery changed the world. Our modern life just as scientific research would be quite different without the laser." Dr. Ferenc Krausz, Director, Max Planck Institute for Quantum Optics, Garching, Germany, and Professor of Physics, Ludwig Maximilian University, Munich, and pioneer in attosecond lasers and attophysics "Maiman had the stroke of genius needed to take a different approach [from his competitors]. The sheer elegance and simplicity of his design belies the intellectual achievement it represents. If his invention seems obvious to some today, it was far from obvious in 1960." Jeff Hecht, authoritative science writer on the historical development of the laser, author of books on lasers and fiber optics

Memoirs of a Fellow Wanderer Nov 23 2021 These memoirs of the great fellowwalker Alfred Wainwright, author of the Pictorial Guides to the Lakeland Fells and many other volumes of walking guides and sketchbooks, are full of his thoughts on life and on his experiences on the fells. Wainwright writes about his boyhood in Blackburn, his work and interests as a young man, and the visit to the Lake District at the age of 23 which kindled in him a lasting passion for the fells. He reveals how he set about researching and compiling the Pictorial Guides, the labour of love which occupied so many years of his life. For walkers and other lovers of the Lakeland fells, this is a great read.

Genius Envy Jul 08 2020 In *Genius Envy*, Adrianna M. Paliyenko uncovers a forgotten history: the multiplicity and diversity of nineteenth-century French women's poetic voices.

Conservative critics of the time attributed the phenomenon of genius to masculinity and dismissed the work of female authors as "feminine literature." Despite the efforts of leading thinkers, critics, and literary historians to erase women from the pages of literary history, Paliyenko shows how these female poets invigorated the debate about the origins of genius and garnered considerable recognition in their time for their creativity and bold aesthetic ideas. This fresh account of French women poets' contributions to literature probes the history of their critical reception. The result is an encounter with the texts of celebrated writers such as Marceline Desbordes-Valmore, Anaïs Ségalas, Malvina Blancheotte, Louisa Siefert, and Louise Ackermann. Glimpses at the different stages of each poet's career show that these women explicitly challenged the notion of genius as gender specific, thus advocating for their rightful place in the canon. A prodigious contribution to studies of nineteenth-century French poetry, Paliyenko's book reexamines the reception of poetry by women within and beyond its original context. This balanced and comprehensive treatment of their work uncovers the multiple ways in which women poets sought to define their place in history.

Daughters of the Sea Jul 28 2019 When Veronica married Guy, she didn't know it would mean more than twenty years of constant change, a new home every year in a different coastal town. Finally, she'd had enough, and fled with her teenage daughter to Whisper Mountain, to the home of her oldest friend. What she found there was a new life, a shifting from sea tides to hidden mountain springs, which renewed her, but also tested the courage of all three women.

Powered by Girl Dec 13 2020 A playbook for working with and training girls to be activists of their own social movements Drawing from a diverse collection of interviews with women and girl activists, *Powered by Girl* is both a journalistic exploration of how girls have embraced activism and a guide for adults who want to support their organizing. Here we learn about the intergenerational support behind thirteen-year-old Julia Bluhm when she got Seventeen to go Photoshop free; nineteen-year-old Celeste Montaña, who pressed Google to diversify their Doodles; and sixteen-year-old Yas Necati, who campaigns for better sex education. And we learn what experienced adult activists say about how to scaffold girls' social-change work. Brown argues that adults shouldn't encourage girls to "lean in." Rather, girls should be supported in creating their own movements—disrupting the narrative, developing their own ideas—on their own terms.
