*Stone in Historic Buildings* Jul 31 2022 There is considerable academic and practical interest in stone and stone buildings, as exemplified by the wide range of high-quality and innovative work being conducted in the pursuit of the effective preservation and restoration of historic buildings. This is reflected in the numerous publications on stone and stone buildings that regularly find their way into the public domain. Not least amongst these are a number of Geological Society Special Publications, which have appeared in recent years. This current volume seeks to bring to the attention of the various professionals in the field (geologists, architects, engineers, conservators and conservation scientists) recent work centred on the characterization and performance of this important resource and its use in historic buildings. The volume has wider relevance, including to those interested in the heritage of stone.

**City of Saints** Mar 27 2022 It was far from inevitable that Rome would emerge as the spiritual center of Western Christianity in the early Middle Ages. After the move of the Empire's capital to Constantinople in the fourth century and the Gothic Wars in the sixth century, Rome was gradually depleted physically, economically, and politically. How then, asks Maya Maskarinec, did this exhausted city, with limited Christian presence, transform over the course of the sixth through ninth centuries into a seemingly inexhaustible reservoir of sanctity? Conventional narratives explain the rise of Christian Rome as resulting from an increasingly powerful papacy. In *City of Saints*, Maskarinec looks outward, to examine how Rome interacted with the wider Mediterranean world in the Byzantine period. During the early Middle Ages, the city imported dozens of saints and their legends, naturalized them, and physically layered their cults onto the city's imperial and sacred topography. Maskarinec documents Rome's spectacular physical transformation, drawing on church architecture, frescoes, mosaics, inscriptions, Greek and Latin hagiographical texts, and less-studied documents that attest to the commemoration of these foreign saints. These sources reveal a vibrant plurality of voices—Byzantine administrators, refugees, aristocrats, monks, pilgrims, and others—who shaped a distinctly Roman version of Christianity. *City of Saints* extends its analysis to the end of the ninth century, when the city's ties to the Byzantine world weakened. Rome's political and economic orbits moved toward the Carolingian world, where the saints' cults circulated, valorizing Rome's burgeoning claims as a microcosm of the "universal" Christian church.
