Citizenship Law in Africa Nov 04 2022 Few African countries provide for an explicit right to a nationality. Laws and practices governing citizenship leave hundreds of thousands of people in Africa without a country to which they belong. Statelessness and discriminatory citizenship practices underlie and exacerbate tensions in many regions of the continent, according to this report by the Open Society Institute. **Citizenship Law in Africa** is a comparative study by the Open Society Justice Initiative and Africa Governance Monitoring and Advocacy Project. It describes the often arbitrary, discriminatory, and contradictory citizenship laws that exist from state to state, and recommends ways that African countries can bring their citizenship laws in line with international legal norms. The report covers topics such as citizenship by descent, citizenship by naturalization, gender discrimination in citizenship law, dual

citizenship, and the right to identity documents and passports. It describes how stateless Africans are systematically exposed to human rights abuses: they can neither vote nor stand for public office; they cannot enroll their children in school, travel freely, or own property; they cannot work for the government.--Publisher description.

Subjectivity, Citizenship and Belonging in Law Sep 09 2020 This collection of articles critically examines legal subjectivity and ideas of citizenship inherent in legal thought. The chapters offer a novel perspective on current debates in this area by exploring the connections between public and political issues as they intersect with more intimate sets of relations and private identities. Covering issues as diverse as autonomy, vulnerability and care, family and work, immigration control, the institution of speech, and the electorate and the right to vote, they provide a broader canvas upon which to comprehend more complex notions of citizenship, personhood, identity and belonging in law, in their various ramifications.

Migration, Asylum and Citizenship Law in Ireland Sep 21 2021 The book is targeted at academics and students working in the field of migration and asylum law. It will also be of interest to practitioners and to policy makers in Europe, as the first extended scholarly analysis of this field of Irish law. Many of the significant legislative, constitutional and jurisprudential changes that have occurred, have resulted from contested claims arising under EU, ECHR and comparative constitutional law. The book will interest scholars across these fields, and will become a key reference work for the legal profession and researchers in the rapidly expanding area of migration and asylum law. The book is likely to attract significant interest in North America, where debates on citizenship law in Ireland in particular have been followed closely, given the transnational judicial dialogue in Irish courts, referencing US case-law, and the close links between academics and the superior courts in both jurisdictions. Current scholarly work on citizenship law in Ireland has been widely cited in key texts by leading immigration law scholars in the US and Canada, for example.

Defining British Citizenship Jun 30 2022 Unlike many nations Britain had not developed a national citizenship by the 20th century. Instead belonging in Britain was merely a function of allegiance to the Crown. This lack of definition was seen as beneficial. This title explores the implications of such vagueness as a new millennium begins.

Does an Inclusive Citizenship Law Promote Economic Development? Jul 20 2021 This paper analyzes the impact of citizenship laws on economic development. We first document the evolution of citizenship laws around the world, highlighting the main features of jus soli, jus sanguinis as well as mixed regimes, and shedding light on the channels through which they could have differentiated impact on economic development. We then compile a data set of citizenship laws around the world. Using cross-country regressions, panel-data techniques, as well as the synthetic control method and subjecting the results to a battery of tests, we find robust evidence that jus soli laws—being more inclusive—lead to higher income levels than alternative citizenship rules in developing countries, though to a less extent in countries with stronger institutional environment.

Citizenship Law in Africa: 3rd Edition Oct 03 2022 Few African countries provide for an explicit right to a nationality. Laws and practices governing citizenship effectively leave hundreds of thousands of people in Africa without a country. These stateless Africans can neither vote nor stand for office; they cannot enrol their children in school, travel freely, or own property; they cannot work for the government; they are exposed to human rights

abuses. Statelessness exacerbates and underlies tensions in many regions of the continent. Citizenship Law in Africa, a comparative study by two programs of the Open Society Foundations, describes the often arbitrary, discriminatory, and contradictory citizenship laws that exist from state to state and recommends ways that African countries can bring their citizenship laws in line with international rights norms. The report covers topics such as citizenship by descent, citizenship by naturalisation, gender discrimination in citizenship law, dual citizenship, and the right to identity documents and passports. It is essential reading for policymakers, attorneys, and activists. This third edition is a comprehensive revision of the original text, which is also updated to reflect developments at national and continental levels. The original tables presenting comparative analysis of all the continent's nationality laws have been improved, and new tables added on additional aspects of the law. Since the second edition was published in 2010, South Sudan has become independent and adopted its own nationality law, while there have been revisions to the laws in Côte d'Ivoire, Kenya, Libya, Mali, Mauritania, Namibia, Niger, Senegal, Seychelles, South Africa, Sudan, Tunisia and Zimbabwe. The African Commission on Human and Peoples' Rights and the African Committee of Experts on the Rights and Welfare of the Child have developed important new normative guidance.

Citizenship in the Arab World Dec 01 2019 Subject: The book is the fruit of five years of on-site research on citizenship in the Arab world. It takes a broader legal perspective to the multifaceted reality of nationality and citizenship. The methodology employed builds on the interdisciplinary approach of comparative legal studies, and brings in theories, concepts and insights from anthropology, political science, Arab and Islamic studies, linguistics and sociology. The work relies on a broad range of Western and Arab references, and all sources and documents were directly accessed in their original languages; this is particularly relevant for Arab legislation (all in-text reference has been translated by the author, and the original has been inserted using scientific transliteration). -- Website OAPEN Library.

The Citizenship Law of the USSR Aug 21 2021 In 1968, the predecessor of this volume was published as Number 15 of the Law in Eastern Europe series, under the title "Soviet Citizenship Law". The decision to put out a new version of that study was prompted by the enactment in 1978 of the CUTtent Law on the Citizenship of the USSR and the various changes in Soviet practice in this domain which occurred in the intervening decade. I have drawn on the earlier work for background material and in order to make comparisons between the previous record here and the substance of the latest statute. However, the present monograph is not a second edition in the sense of being an expanded and updated revision of the original, but stands as an independent piece of research and analysis. Thus, three of the chapters (out of a total of six) featured in the 1968 volume - citizenship and state succession, state succession and option of nationality, and refugees and displaced persons - have now been omitted for the simple reason that the situation in these areas has remained virtually static during the past ten years so that the initial treatment requires no significant alteration. On the other hand, fresh problems have meantime arisen - such as, for instance, the connection between citizenship and emigration, and the relationship between citizenship status and the international protection of human rights - which called for attention and are dealt with in this book.

Citizenship and Immigration Dec 25 2021 "This is a superb piece of scholarship. Joppke manages to cover an extraordinary range of theoretical questions and empirical findings within a very compact and readable book. He coherently synthesizes and cogently brings together an array of different literatures that have often remained separate from one another. In doing so, he provides a 'state of the art' overview and analysis of the topics of citizenship and immigration." Marc Morjé Howard, Georgetown University "Citizenship and Immigration is an outstanding analysis of one of the most dramatic developments in the contemporary world, especially in Europe - namely the impact of immigration on the reconstitution of citizenship and of discussions thereof. It is essential reading for anybody interested in the contemporary scene." S. N. Eisenstadt, Van Leer Jerusalem Institute "Few scholars know the citizenship and immigration literature like Christian Joppke. In this tour de force, Joppke moves nimbly from social theory to current policy developments in Europe, North America and Australia. He paints a nuanced picture of the liberal evolution of citizenship, remaining attentive to governments' recent exclusionary moves. A must-read!" Irene Bloemraad, University of California, Berkeley This incisive book provides a succinct overview of the new academic field of citizenship and immigration, as well as presenting a fresh and original argument about changing citizenship in our contemporary human rights era. Instead of being nationally resilient or in postnational decline, citizenship in Western states has continued to evolve, converging on a liberal model of

inclusive citizenship with diminished rights implications and increasingly universalistic identities. This convergence is demonstrated through a sustained comparison of developments in North America, Western Europe, and Australia. Topics covered in the book include: recent trends in nationality laws; what ethnic diversity does to social citizenship; the decline of multiculturalism yet continuing rise of antidiscrimination policies; and the new state campaigns to upgrade and re-nationalize citizenship in the post-2001 period. Sophisticated and informative, and written in a lively and accessible style, this book will appeal to upper-level students and scholars in sociology, political science, and immigration and citizenship studies.

Citizenship and Constitutional Law Aug 01 2022 The papers collected in this volume highlight the complex dynamic relationship between citizenship - as membership status - and the constitutional law which provides the cornerstone of all polities. It shows the many different ways in which we must use constitutional law in order fully to understand how one becomes a citizen, and what the meaning of citizenship is. Edited by a leading authority in the field, this volume contains the key works which cover national, transnational and international aspects of the topic, and the book provides a particular focus on how constitutional law constructs and upholds the range of citizenship rights. With an original introduction by the editor, this timely collection will be a valuable source of reference for students, academics and practitioners interested in citizenship and constitutional law.

Children and Citizenship Jul 28 2019 *Children and Citizenship* offers a contemporary and critical approach to the central debates around notions of children's citizenship. Drawing on different disciplinary perspectives and including contributions by leading scholars in the field, this book makes explicit connections between theoretical approaches, representations of childhood, and the experiences of children themselves, legal instruments, policies, and their implementation. The book contains reflections on the notion of children's citizenship in general as well as in relation to international instruments, in particular the UN Convention on the Rights of the Child (UNCRC), the case law of the European Convention on Human Rights (ECHR), and EU legislation relating to citizenship and children's rights.
