**Messy Maths Jan 17 2022 In Messy Maths: A Playful, Outdoor Approach for Early Years, Juliet Robertson offers a rich resource of ideas that will inspire you to tap into the endless supply of patterns, textures, colours and quantities of the outdoors and deepen children's understanding of maths through hands-on experience. Juliet believes being outside makes maths real. In the classroom environment, maths can seem disconnected from everyday reality but real maths is really messy. Lots of outdoor play and engaging activity along the way is a must, as being outside enables connections to be made between the hands, heart and head, and lays the foundations for more complex work as children grow, develop and learn. Following on from the success of Dirty Teaching (ISBN 978-178135107-9), Messy Maths reimagines the outdoor space through a mathematical lens providing a treasure trove of suggestions that will empower you to blend outdoor learning into your teaching practice. It is not a 'how to' guide, but rather an easy-to-use reference book replete with ready-to-use games and open-ended ideas designed to help children become confident and skilled in thinking about, using and exploring abstract mathematical concepts as they play outside. Many of these ideas and activities are also beautifully displayed in full-colour photographs throughout the book, making it even easier to jump straight into outstanding outdoor learning opportunities. Topics covered include: general advice; exploring numbers; number functions and fractions; money; measurement; time; pattern; shape and symmetry; position, direction and movement; data handling; routines; and the mathematical garden. Each chapter features a section on topic-specific vocabulary and expressions to help you integrate terminology into each area of study, while suggestions for embedding maths into routines are also provided to assist in the development of creative, progressive and flexible approaches to everyday situations. Messy Maths is suitable for early years educators (of ages 3 to 6) who want to shake up their usual classroom practice and make the most of any outdoor space - whether this be a nursery, playgroup, child-minder's back garden or a nature kindergarten as a context for maths. Messy Maths has been named the Gold Winner in the Mathematics category of the Nursery World**

**Crossing Borders for the Truth Aug 20 2019** The time is post-World War II; the place is the United States and sporadically several "at-risk" foreign countries. The story is about a young scientist, Richard, who believes that the origins of violence and warfare can be found in the early life experiences of individuals. To test this belief, Richard insists he must have firsthand research experience, which means traveling to foreign countries to observe local populations under stress and to study their children. In the process, he meets many intriguing people and inadvertently gets entangled in a potentially dangerous espionage operation. William Charlesworth has created a story embodying two problems: on epistemological, the other biobehavioral. The first is the problem of acquiring the truth of something firsthand as a valid substitute for learning through potentially unreliable intermediaries such as the popular media. The second problem is the question of whether the origins of violence lie in normal resource competition between individuals rather than in some form of innate human pathology. While conducting research to deal with these problems, Charlesworth's scientist encounters individuals whose survival behavior challenges the value of posing both problems.

**Education Outside the Classroom Nov 03 2020** The Committees report examines the wide range of outdoor learning experiences, from lessons held within school grounds to residential expeditions abroad, and considers the place of outdoor learning in the curriculum from foundation stage to higher education. Issues discussed include: the value of outdoor learning and the decline of opportunities for educational opportunities outside the classroom; the barriers that deter schools from teaching outside the classroom, including perceptions of risks in school trips, the resources and curriculum time available for such trips, availability and costs involved; policy options for the Department for Education and Skills to help encourage schools improve and expand provision for outdoor learning; and funding implications. The Committees recommendations include that the DfES should issue a Manifesto for Outdoor Learning which gives all students the right to outdoor learning and which should attract a similar funding level to the music manifesto (around £30 million) in order to deliver real change.

**Recruitment of External Candidates as a Function of Human Resources Management in the Company Jun 17 2019** Research Paper (undergraduate) from the year 2009 in the subject Business economics - Personnel and Organisation, grade: 1, University of Zagreb (University of Zagreb), course: Aftergraduate study for business management - MBA, language: English, abstract: Modern business policy is based upon successful management of resources, especially human resources. Employment and recruitment are becoming human resource basic functions. Companies and organizations must consider again their own business policy and goals, in order to define and realize optimal business policy, particularly human resources recruitment. Recruitment of internal candidates is almost a rule for solving the problem of shortage in certain profile of employees. Yet, mostly, in the situation of insufficient human resources, we focus our attention to external candidates, through cooperation with media, educational institutions, agencies and other communication approaches. Media have emphasized role. Advertising on the Internet, newspapers and TV depends on many variables. Besides cost aspect there is significance in communication aspect, an rising attention onto target group from which we plan to recruit our candidates. Therefore, media role is growing in importance, not only in sales, public relations or promotion, but also in employment, actually, in recruitment of human resources from external sources. Choice of an appropriate media and an adequate message in advertising are becoming more important for the communication effects of employment process, as well as advertising itself. In the Internet domination era and development of new communication approaches (social networks and Internet forums),

individuals and organizations are focusing their attention to this media and its potential. Growing number of opportunities and target markets' new value system are recognizable through growing number of Internet sites, portals, but also in the Internet browser influence (Google, Yahoo, Bing...). Campaigns for

**The Godless Delusion** Jan 25 2020 What if the whole "God delusion" approach is a neo-colonial imposition at the linguistic and philosophical level? Could it lead to unmitigated disasters in intercultural communication and development work? This paradigm-challenging book points to the necessity, in light of contemporary impasse in intercultural understanding, of God's involvement in the encounter between the West and the majority world, especially Africa. Failure to account for God, the cradle of imagination operative in human hearts and minds has resulted in a black hole that deeply troubles intercultural engagement between the West and others. While drawing on his personal long-term field experience in Africa, the author cites contemporary scholarly Western literature on philosophy, anthropology, "religion," and beyond. Ironically, the West, which values dualism, instead of seeking to share it with majority world people, wrongly presupposes its universality. A proactive compliance to the countering of "racism" and to the demotion of impacts of human imagination on understanding contribute to this. Effective education must be from known to unknown, this text emphasizes. Enabling African people to build understanding on their own epistemological foundations might be more important than exporting of pre-packaged languages and educational systems from the West.

**Value-Creation in Middle Market Private Equity** Mar 07 2021 Seen as the job creating engine within the U.S. economy, small business is often a prime target market for private equity investment. Indeed, private equity backs over six of each 100 private sector jobs. Both the small businesses in which private equity firms invest, and the private equity firms making the investments, face inter- and intra-company fiduciary leadership challenges while implementing formulated strategy. The architecture of each private equity firm-portfolio company relationship must be uniquely crafted to capitalize on projected ROI that is memorialized in the investment thesis. Given the leveraged capital structure of portfolio companies, the cost of a misstep is problematic. In Value -Creation in Middle Market Private Equity, John A. Lanier examines relationships between middle market private equity firms and their portfolio companies.

*States in Disguise Apr 08 2021 There is a long history of state governments providing support to nonstate armed groups fighting battles in other countries. Examples include Syria's aid to Hamas, Ecuador's support for FARC, and Libya's donation of arms to the IRA. What motivates states to do this? And why would rebel groups align themselves with these states? In States in Disguise, Belgin San-Akca builds a rigorous theoretical framework within which to study the complex and fluid network of relationships between states and rebel groups, including ethnic and religious insurgents, revolutionary groups, and terrorists. She proves that patterns of alliances between armed rebels and modern states are hardly coincidental, but the result of systematic and strategic choices made by both states and rebel groups. San-Akca demonstrates that these alliances are the result of shared conflictual, material and ideational interests, and her theory shows how to understand these ties via the domestic and international environment. Drawing from an original data set of 455 groups, their target states, and supporters over a span of more than sixty years, she explains that states are most likely to support rebel groups when they are confronted with internal and external threats simultaneously, while rebels select strong states and democracies when seeking outside support. She also shows that states and rebels look to align with one another when they share ethnic, religious and ideological ties. Through its broad chronological sweep, States in Disguise reveals how and why the phenomenon of state and rebel group alliances has evolved over time.*
