Shifting Continents / Colliding Cultures Sep 04 2020 In the wake of the steady expansion and more recent explosion of Anglo-Indian and Indo-Anglian writing, and following the success of Salman Rushdie's *Midnight's Children*, the literature of the Indian diaspora has become the object of close attention. As a body of literature, it simultaneously represents an important multicultural perspective within individual 'national' literatures (such as those of Canada or Australia) as well as a more global perspective taking in the phenomena of transculturalism and diaspora. However, while readers may share an interest in the writing of the Indian diaspora, they do not always interpret the notion of 'Indian diaspora' in the same way. Indeed, there has been much debate in recent years about the appropriateness of terms such as diaspora and exile. Should these terms be reserved for the specifically historical nature of problems encountered in the process of acquiring new nationality and citizenship, or can they be extended to the writing of literature itself or used to describe 'economic' migration arising out of privilege? As a response to these debates, *Shifting Continents/Colliding Cultures* explores the aftermath of British colonialism on the Indian subcontinent and Sri Lanka, including the resulting diaspora. The essays also examine zones of intersection between theories of postcolonial writing and models of diaspora and the nation. Particular lines of investigation include: how South-Asian identity is negotiated in Western spaces, and its reverse, how Western identity is negotiated in South-Asian space; reading identity by privileging history; the role of diasporic women in the (Western) nation; how diaspora affects the literary canon; and how diaspora is used in the production of alternative identities in films such as Gurinder Chadha's *Bhaji on the Beach*.

[The Indian Subcontinent](#) Mar 10 2021 The Indian subcontinent has been a hot spot since 1947 when India and Pakistan were formed. Since then, they have been in conflict over religion and land. [Genetic Disorders of the Indian Subcontinent](#) Apr 30 2020 The population of the Indian subcontinent consists of a fine amalgamation of people from diverse tribal, cultural, religious and social backgrounds. Mortality and morbidity from a vast number of medical and

surgical conditions is significant and well above compared to the developed countries. Although a large component of the human health problem is related to infection, malnutrition and other preventable causes, a significant proportion is linked to hereditary factors reflecting in the form of chromosomal, single gene and complex medical diseases. Unusual and unique Mendelian disorders are not uncommon and a number of common medical conditions, such as ischemic heart disease and diabetes mellitus are relatively more prevalent among those living in the developing countries of the Indian subcontinent and as well as among the migrant population groups in the western world. However, true burden of the inherited disorders among the Asian Indians is not known, and probably underestimated. This text includes a detailed and concise account of the social and cultural diversity, medical demography, genetic epidemiology, consanguinity and common genetic disorders affecting people from the Indian subcontinent. In addition, specific issues of genetic services in various regions are addressed.

Tectonics of the Indian Subcontinent Apr 23 2022 This book documents the salient characters of the tectonic evolution of the Indian subcontinent. It showcases the well investigated subcontinent of Gondwana. The book is linked to an updated geological and tectonic map of this region on 1:12,000,000 in scale. The Indian subcontinent displays almost uninterrupted and unique the geological history since about Eo-Archean (~3800 Ma) to recent, with the development of many Proterozoic deformed and metamorphosed fold belts around Archean nuclei, and enormously thick undeformed platform deposits. After their stabilization during late Proterozoic, the subcontinent underwent Paleozoic rifting and deposition of coal-bearing thick sequences, followed by enormously-thick outpouring of Deccan volcanics as a consequence of huge mantle plume. The youngest event in its evolution is the Cenozoic Himalayan Orogenic Mountains, spanning the area between Nanga Parbat and Namcha Barwah; a part of which extends both in Pakistan and Myanmar.

Islamic Architecture of the Indian Subcontinent Dec 19 2021 Encompassing the whole of the Indian subcontinent, this book examines the range of provincial styles of Islamic architecture, from its beginnings in the 13th century to its decline in the 18th and 19th centuries.

Structural Geometry of Mobile Belts of the Indian Subcontinent Aug 23 2019 This book summarizes the latest research on the structural geology of the mobile belts of the Indian subcontinent including the Himalayas, NE Himalayas, Bangladesh thrust belt, Andaman subduction zone, the Aravalli-Delhi, the Central India Tectonic Zone, the Singhbhum, the Eastern Ghats and the Southern granulite terrane. It offers essential information on deformational structures in the mobile belt, such as folding patterns, the character of the shear zone, shear strain analysis, and faults, as well as fault zone rocks. The findings presented here are based on field observations, mapping, sampling and analysis work (e.g. petrographic studies), as well as limited geochemical and geochronological

analysis to support the findings. A discussion on the structural evolution of these mobile belts and their connections with other belts rounds out the coverage.

Interiors of Empire Oct 17 2021 Interiors of Empire uses the methods of design history and material culture studies to analyze the domestic and public interiors of the British and local middle class during the heyday of the British Raj. It contrasts that space within contemporary discourse with analysis of historical evidence, the varying uses of such space, and relevant social practices. Through detailed discussion of these texts, spaces, objects, and practices, this study locates the domestic interiors and public spaces of the empire in the history of the British colonization of India. The book discusses the imagined barrier of the domestic against the local environment, the intrusions of the local and the effects of this on the British in India, and assesses the westernization of domestic and public spaces of the empire.

Videogames in the Indian Subcontinent Nov 06 2020 Videogames in the Indian Subcontinent: Development, Culture(s) and Representations explores the gaming culture of one of the most culturally diverse and populous regions of the world-the Indian subcontinent. Building on the author's earlier work on videogame culture in India, this book addresses issues of how discussions of equality and diversity sit within videogame studies, particularly in connection with the subcontinent, thereby presenting pioneering

research on the videogame cultures of the region. Drawing on a series of player and developer interviews and surveys conducted over the last five years, including some recent ones, this book provides a sense of how games have become a part of the culture of the region despite its huge diversity and plurality and opens up avenues for further study through vignettes and snapshots of the diverse gaming culture. It addresses the rapid rise of videogames as an entertainment medium in South Asia and, as such, also tries to better understand the recent controversies connected to gaming in the region. In the process, it aims to make a larger connection between the development of videogames and player culture, in the subcontinent and globally, thus opening up channels for collaboration between the industry and academic research, local and global.

How Maritime Trade and the Indian Subcontinent Shaped the World Mar 30 2020 World-wide maritime trade has been the essential driver of wealth-creation, economic progress and global human contact. Trade and exchange of ideas have been at the heart of economic, social, political, cultural and religious life and maritime international law. These claims are borne out by the history of maritime trade beginning in the Indian Ocean and connecting to Southeast Asia, Japan, the Americas, East Africa, the Middle East especially the Persian Gulf, the Mediterranean and Europe. This development predates the end of the Ice Age with worldwide flooding and stimulated the establishment of land-based civilizations in the above regions with particular effect on the Greek and Roman empires and even China's 'Celestial' empire. The Indian subcontinent was the original major player in maritime trade, linking oceans and regions. Global maritime trade declined with the fall of Mediterranean empires and the 'dark age' in Europe but revived with Indian Ocean and Asian maritime networks. Shipping and trade studies are hugely practical but can be technical, legalistic and even dull for non-specialists. But this history is a broadly based and exciting account of human interaction at multiple levels, for general readers, specialists and practitioners. It is based on huge reading and rare sources and with an attractive writing style, and full of fascinating sidelights illuminating the historical narrative - and from an author with lifelong experience in international shipping.

The Unfinished Sep 23 2019 The sheer number of unfinished stone monuments in India is staggering and examples appear at some of

India's most famous and well-studied sites that include rock-cut Ellora, Ajanta, and Mamallapuram. Unfinished work also appears on built temples celebrated for the intricacy of their sculpted decoration, such as those in Hoysala kingdom or in Orissa. This detailed study provides an overall coverage of India's unfinished work while addressing a range of issues related to stone-carving by examining a select number of monuments at specific sites. Instead of focusing on a site in its entirety, the study here focuses on specific issues of consequence in the context of unfinished work, as they gain an added weight and significance through discovery of their repetitive occurrence at site after site. At the heart of this book are the many varieties of unfinished stone carving that merit close observation to see what is there and what is not, and to appreciate that all the finished work has been through these various stages of being unfinished before reaching completion.

Hill Railways of the Indian Subcontinent Sep 28 2022 Hill Railways of the Indian Subcontinent describes seven branch lines which climbed into the mountain ranges that span the length and breadth of the countries of India and Pakistan. Some - like the Darjeeling Himalayan - are well known, but others - like the Zhob Valley, Khyber Pass and Kangra Valley lines - are less so. Unsurprisingly, as hill railways, most of them reached remarkable heights, many using ingenious feats of engineering to assist their climb into seemingly impenetrable terrain. These lines served diverse locations, each with its own characteristics, from the hostile territories of the North-West Frontier, along the spectacular foothills of the Himalayas, skirting the Western Ghats of the Deccan down to the gentle rolling landscape of the Nilgiris, or Blue Hills, of South India. The book contains the histories of these seven hill railways including summaries of their operations and routes as well as maps and gradient charts for all seven lines. There are listings of the locomotives operating the hill railways.

The Indian Subcontinent in Literature for Children and Young Adults Jun 25 2022 This bibliography examines literature in English for young people concerning the Indian subcontinent and associated areas, including Bangladesh, India, Nepal, Pakistan, and Sri Lanka. It presents the perspectives of authors native to the region as well as non-native authors, and reflects the rich folklore and traditional culture of the subcontinent, its checkered history, and modern challenges. An introductory essay traces the development of children's literature in the region since 1947 and reviews major themes and trends in western children's literature about the subcontinent. The many entries are organized into chapters by country, which are then subdivided by genre. Further access is afforded by indexes of authors, illustrators, titles, and subjects. Annotations provide plot summary, thematic analysis, and literary evaluation and also assess sensitivity to multicultural and international concerns.

Pilgrimage, Politics, and Pestilence Dec 27 2019 The epicentre of the Muslim universe, Mecca attracts hundreds of thousands of believers every year. Pilgrimage, Politics, and Pestilence studies the organization and meanings of the Haj from India during colonial times and analyses it from political, commercial, and medical perspectives between 1860, the year of the first outbreak of cholera

epidemic in Mecca, and 1920, when the subject of holy places of Islam became a very powerful political symbol in the Indian subcontinent. Contrary to the general belief about colonial policy of non-intervention into religious subjects, the book argues that the state, in fact, kept a close watch on the pilgrimage. Saurabh Mishra examines the 'medicalization' of Mecca through cholera outbreaks and the intrusion of European medical regulations. He underscores how the Haj played an important role in shaping medical policies and practices, debates and disease definitions. The book explores how the Indian Hajis perceived, negotiated, and resisted colonial pilgrimage and medical policies in their quest of an intense spiritual experience. The author recovers the hitherto unexplored perspective of pilgrims' voices—in travelogues, memoirs, newspaper reports, and journals—to present a nuanced analysis of the interaction between religious faith and colonial public health policies during the age of steamships and empire.
