English Made Easy Jun 05 2020 I have often been frustrated and amused by natives who want to be understood only by the collusive, other natives and thus resort to the use of esoteric expressions the meanings of which are only privy to their people or even group. The most enduring manner to memorialize the truth is to render the language understandable, even if it entails going back to its proper roots. Typical of me, I chose the hardest of them all: English, specifically because its rules have been intentionally overlooked or, in some cases, glossed over in favor of a wider comprehensibility, as happened in plastics, computer science or military jargon. Let me put it this way: if there already is a way to say something well, there is no need to create a new way of saying it to the glaring degradation of the language. The purpose of a language is universal understand of what is said. In the case of the English language, make that what is said, how it is said, how it is written and even how it is pronounced. It is pointless for English-speaking people to wrongly interpret the intent of another of their kind or to answer in an equally obfuscating fashion. If I say something, I want to be universally understood in as clear a manner as possible!

**Adversative and Concessive Conjunctions in EFL Writing** Feb 23 2022 This book explores the usage patterns of a group of adversative and concessive conjunctions in English texts written by Chinese EFL learners and their native speaker counterparts. Focusing on probability profiles and systemic potentials, the study encompasses three stages and combines the strengths of two research methods – the corpus-based approach and text-based analysis – to examine the conjunctions under the theoretical framework of systemic functional linguistics and rhetorical structure theory. Starting with an overview of seventeen conjunctions across two corpora in terms of overall frequency, positional distribution and distribution of semantic categories, the book then offers a more detailed discussion of three individual conjunctions, highlighting the interconnections between 1) syntactic positions and co-occurrence patterns and 2) semantic relations encoded by these conjunctions. Lastly, it presents a case study of one full-length text taken from the learner corpus, applying rhetorical structure theory to provide new insights into the relevance of adversative and concessive relations to text structure. This comprehensive, in-depth analysis is both diagnostic and pedagogically informative.

*Processing interclausal Relationships* Jul 27 2019 During the last 10 years, more and more linguistic and psycholinguistic research has been devoted to the study of discourse and written texts. Much of this research deals with the markers that underline the connections and the breaks between clauses and sentences plus the use of these markers -- by adults and children -- in the production and comprehension of oral and written material. In this volume, major observations and theoretical views from both sides of the Atlantic are brought together to appeal to a wide range of linguists, psychologists, and speech therapists. The volume presents contributions from researchers interested specifically in adult language and from others concerned with developmental aspects of language. Some contributors deal primarily with production, whereas others concentrate on comprehension. Some direct their attention to oral discourse while others focus on written texts. To preserve overall coherence, however, the contributors were given the following recommendations: \* With regard to the level of linguistic analysis, the emphasis should be on the clause level -- more particularly, on the relationships between clauses. \* Special emphasis should also be placed on linguistic markers (e.g., connectives, markers of segmentation, punctuation). \* An overview of a given field of research should be offered, and current research should be put into perspective. \* For contributors in the developmental field, attention should be paid to the fact that an account of the acquisition of some language functions throughout childhood should be included only if general principles of interclause relations that might be masked by the exclusive examination of adult evidence could be derived from it.

**Participial Prepositions and Conjunctions in the History of English** Apr 27 2022 Participial prepositions and conjunctions such as considering, during, considered and except are a comparatively recent phenomenon in the history of the English language. They originated in the intense language contact situation between Anglo-French and Middle English in late medieval England. In this book, it is shown that the development is part of a long process of typological change both in the Romance languages and in the English language. Through language contact a productive pattern has been established in English, which still produces new participial prepositions today (e.g. following, based on and looking at). Participial prepositions and conjunctions therefore clearly illustrate the mechanisms and consequences of language change through intense language contact.
