The Secret Aug 27 2019 The tenth-anniversary edition of the book that changed lives in profound ways, now with a new foreword and afterword. In 2006, a groundbreaking feature-length film revealed the great mystery of the universe—The Secret—and, later that year, Rhonda Byrne followed with a book that became a worldwide bestseller. Fragments of a Great Secret have been found in the oral traditions, in literature, in religions and philosophies throughout the centuries. For the first time, all the pieces of The Secret come together in an incredible revelation that will be life-transforming for all who experience it. In this book, you'll learn how to use The Secret in every aspect of your life—money, health, relationships, happiness, and in every interaction you have in the world. You'll begin to understand the hidden, untapped power that's within you, and this revelation can bring joy to every aspect of your life. The Secret contains wisdom from modern-day teachers—men and women who have used it to achieve health, wealth, and happiness. By applying the knowledge of The Secret, they bring to light compelling stories of eradicating disease, acquiring massive wealth, overcoming obstacles, and achieving what many would regard as impossible.

Post-colonial struggles for a democratic Southern Africa May 05 2020 National liberation, one of the grand narratives of the twentieth century, has left a weighty legacy of unfulfilled dreams. This book explores the ongoing struggle for legitimate, accountable political leaders in postcolonial Southern Africa, focussing on dilemmas arising when ex-liberation movements form the governments. While the spread of multi-party democracy to most countries in the region is to be celebrated, democratic practice often has been superficial - a limited, elitist politics that relies on the symbols of the liberation struggle to legitimate de facto one-party rule and authoritarian practices. Using country cases from Tanzania, Swaziland, Zimbabwe, South Africa and Zambia, the collection explores three subthemes relevant to postcolonial governance in Southern Africa: how the struggle for liberation shapes the character of political transformation, the nature of rule in one-party dominant states headed by former liberation movements, and the processes of governance and resistance in post-liberation contexts. This book was published as a special issue of the Journal of Contemporary African Studies.

growth diagnostics for a resource-rich transition economy: the case of mongolia Mar 15 2021 This paper uses a growth diagnostics approach à la Hausmann, Rodrik, and Velasco (HRV) to identify the most 'binding' constraints to private sector growth in Mongolia - a small, low-income, mineral-rich, transition economy. The approach of applying the HRV methodology is useful in those cases where a lack of data prevents us from estimating shadow prices to identify the most 'binding' constraint to growth. We find that although Mongolia is not liquidity constrained and has grown rapidly in recent years, economic growth has been narrowly based. Investment has flowed mainly into a small number of firms operating in mining and construction. The low level of private investment in sectors outside mining and construction has been due to low returns - a result of costly and unreliable transportation services; lengthy and complex transit procedures, including customs and trade rules; distortionary taxes; coordination failures, at both domestic and international levels; and growing corruption. Poor financial intermediation is also a problem that has kept the

cost of finance high, although lower than in previous years. Alleviating these binding constraints will ensure that Mongolia maintains the path towards sustained, broad-based growth.

The Race For A New Game Machine: Oct 10 2020 "A fast-paced tell-all. . .one of the great business stories of our young century." —Steve Cherry, IEEE Spectrum Magazine The Xbox 360 and PlayStation 3 game systems have changed the face of home entertainment. But few know the amazing story inside the consoles—how David Shippy and his team of engineers at the Sony/Toshiba/IBM Design Center (STI) forged the tiny miracle at the core of it all: a revolutionary microprocessor chip that set a new paradigm in personal computing. At stake were the livelihoods—and sanity—of an unsung group of tireless visionaries. At war were the giants Microsoft and Sony. "Drama and secret deals. . . This is the real deal." —Bob Molyneaux, ChipBridge Here is a dazzling, behind-the-scenes account of life in the tech world, featuring memorable characters, high-level corporate intrigue, and cutthroat business dealings. It's a story that's never been told—until now. "The real story of a team of people tasked with doing the impossible." —John C. Beck, author of Got Game "Remarkable. . .fascinating." —Dean Takahashi, author of Opening the Xbox "The story of the whole effort to build the Cell." —The Wall Street Journal

Macro Policy Lessons for a Sound Design of Fiscal Decentralization Sep 20 2021 Fiscal decentralization has been, and remains high on the policy agenda of many countries. It is mainly driven by political pressures, which tend to be especially evident in countries with multiple ethnicities, and/or wide regional disparities in incomes or resource endowments. More generally, decentralization pressures frequently reflect a desire for more participatory government and greater voice of local constituents in the allocation of budgetary resources. Regardless of its motivation, fiscal decentralization can have important macroeconomic implications. Therefore, Fund advice to member countries (whether in the context of surveillance, program design, or technical assistance) has often focused on the design and implementation of intergovernmental fiscal arrangements. This paper distills the main lessons from the Fund's engagement with member countries

in this area, drawing in particular, (but not exclusively) on technical assistance (TA) provided by the Fiscal Affairs Department (FAD) to ten countries which are broadly representative of the range of members that have requested assistance in this area.

Sponsorship: For a Return on Investment Sep 01 2022 Sponsorship is both a critical communications tool for sponsors as well as a fundamental revenue stream for rights owners. Market leaders use sponsorship widely and arguably more successfully than any other communications tool to achieve competitive advantage whilst events of all sizes depend on sponsorship just to exist. As the importance of sponsorship has increased the demands of it have risen too. Now sponsors seek measurable return on their investment. Sponsorship: For a Return on Investment provides a unique insight on the use of sponsorship for a return on investment and will appeal to practitioners and undergraduate and postgraduate students alike. It builds a conceptual framework for the development, planning, implementation and evaluation of strategies for sport, arts, music and community sponsorship, and from two perspectives: For rights owners, the importance of effectively acquiring and then developing a bespoke approach for the recruitment of sponsors for effective sponsorship programmes. For sponsors, a better understanding of how sponsorship can be used for successful integrated marketing communications. A broad selection of examples and case studies from around the world are provided in order to demonstrate the importance of sponsorship on an international basis. This book is vital resource for both students and practitioners.

Self-Made Man Jul 31 2022 A journalist's provocative and spellbinding account of her eighteen months spent disguised as a man. Norah Vincent became an instant media sensation with the publication of Self-Made Man, her take on just how hard it is to be a man, even in a man's world. Following in the tradition of John Howard Griffin (Black Like Me), Vincent spent a year and a half disguised as her male alter ego, Ned, exploring what men are like when women aren't around. As Ned, she joined a bowling team, took a high-octane sales job, went on dates with women (and men), visited strip clubs, and even managed to infiltrate a

monastery and a men's therapy group. At once thought-provoking and pure fun to read, *Self-Made Man* is a sympathetic and thrilling tour de force of immersion journalism.

Design Concepts for a Virtualizable Embedded MPSoC Architecture Jan 01 2020 Alexander Biedermann presents a generic hardware-based virtualization approach, which may transform an array of any off-the-shelf embedded processors into a multi-processor system with high execution dynamism. Based on this approach, he highlights concepts for the design of energy aware systems, self-healing systems as well as parallelized systems. For the latter, the novel so-called Agile Processing scheme is introduced by the author, which enables a seamless transition between sequential and parallel execution schemes. The design of such virtualizable systems is further aided by introduction of a dedicated design framework, which integrates into existing, commercial workflows. As a result, this book provides comprehensive design flows for the design of embedded multi-processor systems-on-chip.

Collaborative Networks for a Sustainable World Jun 17 2021 Collaborative Networks for a Sustainable World Aiming to reach a sustainable world calls for a wider collaboration among multiple stakeholders from different origins, as the changes needed for sustainability exceed the capacity and capability of any individual actor. In recent years there has been a growing awareness both in the political sphere and in civil society including the business sectors, on the importance of sustainability. Therefore, this is an important and timely research issue, not only in terms of systems design but also as an effort to borrow and integrate contributions from different disciplines when designing and/or governing those systems. The discipline of collaborative networks especially, which has already emerged in many application sectors, shall play a key role in the implementation of effective sustainability strategies. PRO-VE 2010 focused on sharing knowledge and experiences as well as identifying directions for further research and development in this area. The conference addressed models, infrastructures, support tools, and governance principles developed for collaborative networks, as important resources to support multi-stakeholder sustainable developments. Furthermore, the challenges of this theme open new research directions for CNs. PRO-VE 2010 held in St.

Evaluation for a Caring Society Jan 13 2021 This book highlights views on responsive, participatory and democratic approaches to evaluation from an ethos of care. It critically scrutinizes and discusses the invisibility of care in our contemporary Western societies and evaluation practices that aim to measure practices by external standards. Alternatively, the book proposes several foci for evaluators who work from a care perspective or wish to encourage a caring society. This is a society that sees evaluation and care as a continuously unfolding relational practice of moral-political learning contributing to life-sustaining webs. 'At one level is the evaluator's immediately responsive and interpersonal encounter with the personal troubles of

social actors, most visible, as Mills originally pointed out, in an individual's biography and in those social settings directly open to the individual's lived experience. (...) At another level, the sociological and political level, the evaluator operates at what Mills called the arena of public issues where immediate personal troubles are seen not only as problems encountered by individuals but as the result of structural and political arrangements in society (...) evaluation for a caring society is thought to operate at both levels' (Thomas A. Schwandt, Professor Emeritus, University of Illinois at Urbana-Champaign). 'The intricate relationship between evaluation and care is hardly addressed by evaluators or caregivers. This book fills a gap, as it focuses on the relationship between evaluation and care and provides a multitude of examples of evaluation as a caring practice (...) the book can serve as an antidote to the present-day haste in social practices, and contribute, in form and content, to developing an evaluation practice which may foster a caring society' (Guy Widdershoven, Professor of Philosophy and Ethics of Medicine and head of the Department of Medical Humanities at VU University Medical Center, VU University Amsterdam).

A Preliminary Design for a Universal Patient Medical Record Jul 07 2020 Major goals of health care in the 21st century are to make health care more efficient and less costly. These goals can be accomplished by implementation of evidence-based care; greater coordination of patient care; implementation of preventive care and wellness measures; and the evaluation of outcomes of care to identify improved ways to provide care. A universal patient medical record can help achieve these goals of more efficient and less costly health care.

Notes for a Young Surfer Apr 15 2021 The beach has long been a privileged site in Australian culture, and surfers have become its icons. For many surfers, young and old, surfing isn't simply a hobby or sport but a treasured way of life. Notes for a Young Surfer taps into the beauty of surfing and also tells the truth about the dark side of surf culture where young men come into contact with violence, misogyny, sex, racism, turf

wars and homophobia. This book reveals the unwritten codes and rituals that rule all aspects of a young man's life in surf culture, from body image and notions of national identity, to politics and mateship. Notes for a Young Surfer uses real stories from the surfing world. It provides surfing tips but is also full of funny, reassuring and practical advice about how to handle the challenges and decisions that young men face. Natural Learning for a Connected World Feb 11 2021 Why do video games fascinate kids so much that they will spend hours pursuing a difficult skill? Why don't they apply this kind of intensity to their school work? In their most penetrating and important work in years, these two leaders in the field of brain-based education build a bridge to the future of education with a dynamic model of teaching that works for all grade levels and in all cultural and ethnic groups. The authors' education model, the "Guided Experience Approach," is based on the way that biologists see learning as a totally natural, continuous interaction between perception and action. *Natural Learning for a Connected World* provides a practical, step-by-step description and successful examples from practice of this perception action cycle so that we can finally provide the learning environments essential for our children to thrive in the knowledge age.

First Five: Your Scientific Solution for a Successful First Impression Nov 22 2021 Use verbal and full-body communication tactics to dissolve anxiety, convey confidence and make an impressive introduction. This illustrated book describes in laser-sharp detail battle-tested techniques for influencing others' perceptions of you. It gives you control over your own conscious and subconscious communications and the capacity to take affirmative action towards creating a purposeful first impression. Imagine you have one small five-minute window to create a solid emotional ecosystem from which every subsequent interaction you have with a

person will build. This ecosystem will subconsciously influence the progression of the relationship, the ease of rapport, and whether you will be able to meet the outcomes and expectations you have for each other. This book curates numerous academic articles and advice from the field of behavioral science, hypnosis, and linguistics to create a functional step-by-step guide full of hands-on, practical solutions to problems you may encounter during a first meeting. It covers everything from ways of managing and defusing your own stress and social anxiety, to ways of responding to aggression in others. This book contains information such as: * Building and communicating confidence * Setting SMARTER Spectral Goals * Dissolving discomfort and minimizing anxiety * Making introductions * Helpful handshake hints * Building rapport through isopraxism and linguistic techniques * Movement, gestures, and body language * How to analyse communications to find the hidden meaning and personality differences * Establishing the correct emotional environment * Having the resiliency needed to overcome failure * Cementing long-term connections Importantly, this book is also illustrated so that we don't just tell you, but also show you the techniques needed to master the perfect first impression. We wanted this book to cover first impression optimisation from a number of different angles so you can choose the correct technique for each individual situation you encounter. After all, sometimes you might want to give off a dominant, confident impression, but sometimes this won't work for the situation. We've outlined the techniques in a short, digestible form and provided insight into some potential scenarios where this tool should and shouldn't be applied. Understanding the different techniques and tools is one thing, but understanding how to apply them is another. Once you have the right tools in your toolbox you can apply these techniques to all subsequent encounters, and develop upon them as you see fit.

The Book of Dave Aug 20 2021 The Book of Dave is Booker-shortlisted author Will Self's dazzling sixth novel What if a demented London cabbie called Dave Rudman wrote a book to his estranged son to give him some fatherly advice? What if that book was buried in Hampstead and hundreds of years later, when rising sea levels have put London underwater, spawned a religion? What if one man decided to question life according to Dave? And what if Dave had indeed made a mistake? Shuttling between the recent past and a far-off future where England is terribly altered, The Book of Dave is a strange and troubling mirror held up to our times: disturbing, satirizing and vilifying who and what we think we are. At once a meditation upon the nature of received religion, a love story, a caustic satire of contemporary urban life and a historical detective story set in the far future - this compulsive novel will be enjoyed by readers everywhere, including fans of Martin Amis and Anthony Burgess's *A Clockwork Orange*. 'Vivid, visceral and breathtakingly ambitious, this is Self's best yet' GQ 'Mindboggling ... darkly hilarious ... A fascinating book' Evening Standard Will Self is the author of nine novels including *Cock and Bull*; *My Idea of Fun*; *Great Apes*; *How the Dead Live*; *Dorian, an Imitation*; *The Book of Dave*; *The Butt*; *Walking to Hollywood and Umbrella*, which was shortlisted for the Man Booker Prize. He has written five collections of shorter fiction and three novellas: *The Quantity Theory of Insanity*; *Grey Area*; *License to Hug*; *The Sweet Smell of Psychosis*; *Design Faults in the Volvo 760 Turbo*; *Tough, Tough Toys for Tough, Tough Boys*; *Dr. Mukti and Other Tales of Woe and Liver: A Fictional Organ with a Surface Anatomy of Four Lobes*. Self has also compiled a number of nonfiction works, including *The Undivided Self: Selected Stories*; *Junk Mail*; *Perfidious Man*; *Sore Sites*; *Feeding Frenzy*; *Psychogeography*; *Psycho Too* and *The Unbearable Lightness of Being a Prawn Cracker*.

Human Resources Development Review 2008 May 17 2021 Through 25 chapters authored by some of the leading researchers in the field, the Human Resources Development Review 2008 provides an extensive overview of the contextual factors driving human resources development in South Africa. A key theme throughout the volume is the importance of a multi-faceted skills development strategy operating at three levels. The first entails high-skills policies aimed at expanding export-oriented manufacturing production and services provision, particularly in new globally competitive 'niche' areas. The second relates to the economy's ongoing need for intermediate skills, as is evident in the shortage of skilled artisans and technologists. Finally, the provision of basic, entry-level skills is important in view of the urgent need for large-scale job creation schemes, triggered by public sector initiatives, to ameliorate high levels of unemployment and despondency, especially amongst the youth.

Spatial Microsimulation: A Reference Guide for Users Mar 03 2020 This book is a practical guide on how to design, create and validate a spatial microsimulation model. These models are becoming more popular as academics and policy makers recognise the value of place in research and policy making. Recent spatial microsimulation models have been used to analyse health and social disadvantage for small areas; and to look at the effect of policy change for small areas. This provides a powerful analysis tool for researchers and policy makers. This book covers preparing the data for spatial microsimulation; a number of methods for both static and dynamic spatial microsimulation models; validation of the models to ensure the outputs are reasonable; and the future of spatial microsimulation. The book will be an essential handbook for any researcher or policy maker looking to design and create a spatial microsimulation model. This book will also be useful to those policy makers who are commissioning a spatial microsimulation model, or looking to commission work using a spatial microsimulation model, as it provides information on the different methods in a non-technical way.

The Road Jan 25 2022 The post-apocalyptic modern classic with an introduction by novelist John Banville. In a burned-out America, a father and his young son walk under a darkened sky, heading slowly for the coast. They have no idea what, if anything, awaits them there. The landscape is destroyed, nothing moves save the ash on the wind and cruel, lawless men stalk the roadside, lying in wait. Attempting to survive in this brave new world, the young boy and his protector have nothing but a pistol to defend themselves. They must keep walking. Winner of the Pulitzer Prize for Fiction, *The Road* is an incandescent novel, the story of a remarkable and profoundly moving journey. In this unflinching study of the best and worst of humankind, Cormac McCarthy boldly divines a future without hope, but one in which, miraculously, this young family finds tenderness. An exemplar of post-apocalyptic writing, *The Road* is a true modern classic, a masterful, moving and increasingly prescient novel. This edition is part of the Picador Collection, a series of the best in contemporary literature, inaugurated in Picador's 50th Anniversary year.

Fun Home Aug 08 2020 DISCOVER the BESTSELLING GRAPHIC MEMOIR behind the 2019 Olivier Award nominated musical. 'A sapphic graphic treat' *The Times* A moving and darkly humorous family tale, pitch-perfectly illustrated with Alison Bechdel's gothic drawings. If you liked Marjane Satrapi's *Persepolis* you'll love this. Meet Alison's father, a historic preservation expert and obsessive restorer of the family's Victorian home, a third-generation funeral home director, a high-school English teacher, an icily distant parent, and a closeted homosexual who, as it turns out, is involved with his male students and the family babysitter. When Alison comes out as homosexual herself in late adolescence, the denouement is swift, graphic, and redemptive. Interweaving between childhood memories, college life and present day, and through narrative that is equally heartbreaking and fiercely funny, Alison looks back on her complex relationship with her father and finds they had more in common than she ever knew. 'A groundbreaking masterpiece' *The Independent* 'A finely woven blend of yearning and euphoric fantasy' *Evening Standard*

Education for a New Era Jan 31 2020 Describes the first phase (2001-2004) of Qatar's bold K-12 education reform initiative, Education for a New Era, based on RAND's experiences as part of this ambitious, multi-participant effort. RAND examined the existing Qatari education system, recommended options for building a world-class system, and supported implementation of the chosen option, which is based on internationally benchmarked curriculum standards and parental choice of schools.

The God Delusion. 10th Anniversary Edition Nov 03 2022 The God Delusion caused a sensation when it was published in 2006. Within weeks it became the most hotly debated topic, with Dawkins himself branded as either saint or sinner for presenting his hard-hitting, impassioned rebuttal of religion of all types. His argument could hardly be more topical. While Europe is becoming increasingly secularized, the rise of religious fundamentalism, whether in the Middle East or Middle America, is dramatically and dangerously dividing opinion around the world. In America, and elsewhere, a vigorous dispute between 'intelligent design' and Darwinism is seriously undermining and restricting the teaching of science. In many countries religious dogma from medieval times still serves to abuse basic human rights such as women's and gay rights. And all from a belief in a God whose existence lacks evidence of any kind. Dawkins attacks God in all his forms. He eviscerates the major arguments for religion and demonstrates the supreme improbability of a supreme being. He shows how religion fuels war, foments bigotry and abuses children. The God Delusion is a brilliantly argued, fascinating polemic that will be required reading for anyone interested in this most emotional and important subject.

Caring for a Living Apr 27 2022 The world is aging at a great speed. While this is a remarkable

achievement, aging also brings new challenges, among them a growing need for long-term care. 'Caring for a Living' specifically investigates Italy's employment of home eldercare assistance, an arrangement whereby long term care services are bought in the market in the form of private and individualized assistance - predominantly female immigrants.

Hope for a Heated Planet Dec 24 2021 Rejecting cries of gloom and doom, *Hope for a Heated Planet* shows how the fight against global warming can be won by the grassroots efforts of individuals. Robert K. Musil, who led the Nobel Peace Prize-winning organization Physicians for Social Responsibility, explains that a growing new climate movement can produce unprecedented change-in the economy, public health, and home-while saving the planet. Musil draws on personal experience and compelling data in this practical and rigorous analysis of the causes and cures for global warming. The book presents all the players in the most pressing challenge facing society today, from the massive fossil fuel lobby to the enlightened corporations that are joining the movement to "go green." Musil thoroughly explains the tremendous potential of renewable energy sources-wind, solar, and biofuel-and the startling conclusions of experts who say society can do away entirely with fossil fuels. He tells readers about the engaged politicians, activists, religious groups, and students who are already working together against climate change. But the future depends, Musil insists, on what changes ordinary citizens make. Through personal choices and political engagement, he shows how readers can cut carbon emissions and create green communities where they live. With practical and realistic solutions, *Hope for a Heated Planet* inspires readers to be accountable and enables them to usher in an age of sustainability for future generations.
