This is why you remain in the best website to see the amazing book to have.

Textbook of Palliative Care Oct 22 2021 Textbook of Palliative Care is a comprehensive, clinically relevant and state-of-the art book, aimed at advancing palliative care as a science, a clinical practice and as an art. Palliative care has been part of healthcare for over fifty years but we still

find ourselves having to explain its nature and practice to colleagues and to the public in general. Healthcare education and training has been slow to recognize the vital importance of ensuring that all practitioners have a good understanding of what is involved in the care of people with serious or advanced illnesses and their families. However, the science of

palliative care is advancing and our understanding concerning many aspects of palliative care is developing rapidly. The book is divided into separate sections for ease of use. Over 100 chapters written by experts in their given fields provide up-to-date information on a wide range of topics of relevance to those providing care towards the end of life no matter what the disease may be. We present a global perspective on contemporary and classic issues in palliative care with authors from a wide range of disciplines involved in this essential aspect of care. The Textbook includes sections addressing aspects such as symptom management and care provision, organization of care in different settings, care in specific disease groups, palliative care emergencies, ethics, public health approaches and research in palliative care. This Textbook will be of value to practitioners in all disciplines and professions where the care of people approaching death is important, specialists as well as non-specialists, in any setting where people with serious advanced illnesses are residing. It is also an important resource for researchers, policy-and decision-makers at national or regional levels. Neither the science nor the art of palliative care will stand still so we aim to keep this Textbook updated as the authors find new evidence and approaches to care.

Mosby's Textbook for the Home Care Aide Nov 22 2021 This convenient, money-saving package is a must-have for home care aide students! It includes Birchenall's *Mosby's Textbook for the Home Care Aide*, 2nd edition text & the *Workbook for Mosby's Textbook for the Home Care Aide*, 2nd edition.

Level 2 Health and Social Care Diploma Apr 03 2020 Step-by-step guidance through the units, evidence and assessment for the Level 2 Diploma (formerly NVQ). Work-based learning can be challenging but Caroline Morris and Val Michie have set out all the information and practical help you need to get your qualification. This guide includes all 9 of the Core Units and a selection of the most popular optional units - the ones that most people tend to encounter in Health and Social Care jobs. The book is packed with a range of Health and Social Care case studies. Inside you'll also find a range of features designed to help you work

through your units with confidence: - Get ready for assessment; tick off your understanding of what's required and keep track of your progress. - Make sure you know to prepare the correct evidence using our Evidence & Practice Activities, tips on gathering written portfolio evidence and how to demonstrate competence. - The textbook focuses on what you really need to know in simple language. - Written by experienced External Verifiers for a major awarding body. - Suitable for City and Guilds, Edexcel, EDI, OCR and all other awarding bodies.

Textbook of Palliative Medicine Feb 23 2022 *Textbook of Palliative Medicine* provides an alternative, truly international approach to this rapidly growing specialty. This textbook fills a niche with its evidence-based, multi-professional approach and global perspective ensured by the international team of editors and contributing authors. In the absence of an international curriculum for the study of palliative medicine, this textbook provides essential guidance for those both embarking upon a career in palliative medicine or already established in the field, and the structure and content have been constructed very much with this in mind. With an emphasis on providing a service anywhere in the world, including the important issue of palliative care in the developing nations, *Textbook of Palliative Medicine* offers a genuine alternative to the narrative approach of its competitors, and is an ideal complement to them. It is essential reading for all palliative care physicians in training and in practice, as well as palliative care nurses and other health professionals in the palliative care team

Textbook of Integrative Mental Health Care Jul 27 2019 Dr. Lake has made a significant contribution to integrative medicine in this book by helping to weave the integral tapestry around the complex issues of mental illness. In honor of his efforts to restore healing and meaning to mental healthcare, I bow deeply. --From the foreword by Larry Dossey, MD Dr. James Lake once again illumines the path to future medicine in this comprehensive, carefully researched, and intellectually engaging exploration of clinical integration of complementary and conventional therapies in mental health care. In a rigorous, dispassionate analysis he both reveals the outer frontiers of medical possibility and describes the

professional boundaries necessary to reach such frontiers in ways that are clinically responsible as well as ethically unassailable. --Michael H. Cohen, JD, MBA, Assistant Clinical Professor, Department of Medicine, Harvard Medical School, and Assistant Professor, Department of Health Policy and Management, Harvard School of Public Health Dr. Lake has written the defining textbook for evidence-based integrative mental health care. He has comprehensively evaluated the research support for both conventional and natural therapies and redefined how we understand and treat mental health patients. His careful flow charts help guide the clinician through the challenge of assessment and differentiation to personalize therapies based on each patient's unique needs. Clinicians will also find of immense value his many tables, which summarize the evidence base for each intervention. This is a tour-de-force that forever redefines mental health care. --Joseph Pizzorno, ND, Founding President, Bastyr University This text offers an evidence-based approach to incorporating integrative psychiatry into practice that is pragmatic and useful, a great addition to the field of integrative medicine. --Roberta Lee, MD, Medical Director, Continuum Center for Health and Healing Dr. Lake must be congratulated for this groundbreaking work on CAM in psychiatry. It not only provides a conceptual framework for a deeper understanding of disease of the mind-body-spirit, but also gives evidence-based blueprints for where we are and where we could go. A must read for mental health professionals interested in the philosophy and practice of integrative psychiatry. --Richard P. Brown, MD, Associate Professor, Department of Clinical Psychiatry, Columbia College of Physicians and Surgeons This text is comprehensive and authoritative, well written and widely referenced. It will, I hope, enlarge the way we think about mental health and treat psychiatric disorders. --James S. Gordon, MD, Founder and Director of the Center for Mind-Body Medicine This book provides a comprehensive review of integrative approaches in mental health. Here the practitioner will find clear guidance in an evidence-based manner. A wonderful contribution. --Wayne B. Jonas, MD, Director Samueli Institute for Information Biology This book is a tour de force in the emerging field of integrative

psychiatry. The author presents the material in each chapter in a systematic, thoughtful, thorough, and practical manner. The text itself is integrative in the way it discusses management issues that a provider may encounter. As the number of patients who already include - or wish to add - alternative methods in their overall treatment plan continues to grow, this text provides an important comprehensive resource for busy providers. Health care professionals from many different disciplines who need a serious reference text on integrative psychiatry and who wish to optimize options for their patients with chronic psychiatric disorders will find this book indispensable. --Iris R. Bell, MD, PhD, Professor, Departments of Family and Community Medicine, Psychiatry, Psychology, Medicine, and Public Health, The University of Arizona
The City & Guilds Textbook Level 2 Diploma in Adult Care May 29 2022 Excel in Adult Care with the essential companion for the Level 2 Diploma, published in association with City & Guilds and written by expert author, Maria Ferreiro Peteiro. -Perfect your portfolio, with essential advice and activities linked to assessment criteria making it easier to demonstrate your knowledge and skills -Manage the demands of your course, with assessment criteria translated into simple, everyday language and practical guidance -Understand what it means to reflect on practice with 'Reflect on it' activities, and guidance on how to write your own reflective accounts -Learn the core values of care, compassion, competence, communication, courage and commitment required as an Adult Care worker -Summarise and check your understanding with 'Knowledge, Skills and Behaviours' sections at the end of each learning outcome -Successfully apply Adult Care theory in the workplace, using real-world case studies to guide you -Expand your learning with access to three popular optional units available online
Neonatal Care May 05 2020 Neonatal Care provides student midwives, student nurses, nursery nurses and senior health care assistants with a practical and theoretical guide to all aspects of basic neonatal care. All chapters are mapped where appropriate to the NHS Knowledge and Skills Framework (2004) and the NMC Standards of proficiency for pre-registration midwifery education (2004). The role of the health care

assistant is increasing significantly, particularly in the postnatal care of mother and baby, and there is a requirement for them to develop knowledge and skills to support their developing role. This book will enable HCAs to gain an understanding of basic neonatal care, including the identification of issues that may need to be referred to someone with more advanced skills. The chapters provide a gradual progression through the types of neonatal services available, the care the neonate may require and why, and the midwife or nurse's role in facilitating neonatal care within the family. There is also consideration of cultural and diversity issues, communication, and legal and professional matters pertinent to caring for the neonate. All chapters have specific learning outcomes and self assessment exercises to enable readers to assess and track their own progress.

The City & Guilds Textbook Level 3 Diploma in Adult Care for the Lead Adult Care Worker Apprenticeship Feb 11 2021 Excel in Adult Care with the ideal companion for the Level 3 Diploma, published in association with City & Guilds and written by expert author in Health and Social Care, Maria Ferreiro Peteiro. -Enhance your portfolio with key advice and activities linked to assessment criteria, making it easier to demonstrate your knowledge and skills. -Manage the demands of your course with assessment criteria translated into simple, everyday language and practical guidance. -Understand what it means to reflect on practice with 'Reflect on it' activities, and guidance on how to write your own reflective accounts. -Learn the core values of care, compassion, competence, communication, courage and commitment required as an Adult Care worker. -Summarise and check your understanding with 'Knowledge, Skills, Behaviours' tables at the end of each learning outcome. -Successfully apply Adult Care theory in the workplace using real-world case studies to guide you. -Expand your learning with access to popular optional units available online.

Textbook of Dementia Care Sep 01 2022 Textbook of Dementia Care: An Integrated Approach gives an overview of dementia care at a level appropriate to health and social care students, as well as providing an update to experienced practitioners. Authors come from a variety of

backgrounds including nursing, psychiatry, medicine, psychology and allied health professions. There is a good mix of content from experienced new authors, academics and practitioners. The book offers: a comprehensive list of contributors from different disciplines input from people living with dementia and their family carers relevant research to inform practice case examples to illustrate and inform the text. While directed primarily at a nursing and social care readership, the book also provides a readable general text appropriate for all involved in dementia care. It is written by expert practitioners in the field, many of whom are leaders in practice-based research. It incorporates the expertise of representatives of Alzheimer Scotland, but also includes accounts of people living with dementia, families, and carers, giving the reader a unique insight into the disease.

The City & Guilds Textbook Level 2 Diploma in Care for the Adult Care Worker Apprenticeship Dec 12 2020 Excel in Adult Care with the ideal companion for the Level 2 Diploma, published in association with City & Guilds and written by expert author, Maria Ferreiro Peteiro. -Enhance your portfolio with key advice and activities linked to assessment criteria, making it easier to demonstrate your knowledge and skills. - Manage the demands of your course with assessment criteria translated into simple, everyday language and practical guidance. -Understand what it means to reflect on practice with 'Reflect on it' activities, and guidance on how to write your own reflective accounts. -Learn the core values of care, compassion, competence, communication, courage and commitment required as an Adult Care worker. -Summarise and check your understanding with 'Knowledge, Skills, Behaviours' tables at the end of each learning outcome. -Successfully apply Adult Care theory in the workplace, using real-world case studies to guide you. -Expand your learning with access to popular optional units available online.

Textbook of Neuroanaesthesia and Critical Care Aug 08 2020 All aspects of neuroanaesthesia are covered in this up-to-date, highly illustrated textbook. Written for general anaesthetic departments and ICUs, as well as specialist neurosurgical and trauma units, it covers the key areas needed to understand the principles of neuroanaesthesia, such as

functional anatomy, advances in bedside monitoring and imaging techniques. It addresses practical issues of diagnosis and patient care. Best clinical practice is described in detail throughout. It is an essential, one-stop review of modern neuroanaesthesia and neurocritical care for anaesthetists, intensivists and surgeons at all levels of practice.

The Textbook of Health and Social Care Nov 30 2019 A

comprehensive textbook designed to guide students through the entirety of a Health and Social Care BSc degree. Covering the important topics and pressing issues relevant to Health and Social Care today. The book's three part structure starts with the essential areas and core knowledge, including the sociology and psychology of illness, academic skills, the research process, key legal and ethical issues and reflective practice. In the second part, the authors cover a variety of aspects of health and social care in practice, like health promotion, safeguarding children and their rights, and working with people experiencing mental health disorders. Finally, the third part considers some of the challenges faced in present day health and social care, looking at social justice issues, legal and ethical considerations, leadership, and health inequalities. All content is supported by practical and reflective features to help students throughout their degree, these include: Interactive activities, real life case studies and examples related to chapter content, links and suggestions for further reading, and answers to key activities and case studies exercises. The perfect companion text for anyone studying a Health and Social Care degree, or any other course related to the health and social care services.

[Textbook for Transcultural Health Care: A Population Approach](#) Oct 29 2019 This textbook is the new edition of Purnell's famous Transcultural Health Care, based on the Purnell twelve-step model and theory of cultural competence. This textbook, an extended version of the recently published Handbook, focuses on specific populations and provides the most recent research and evidence in the field. This new updated edition discusses individual competences and evidence-based practices as well as international standards, organizational cultural competence, and perspectives on health care in a global context. The individual chapters

present selected populations, offering a balance of collectivistic and individualistic cultures. Featuring a uniquely comprehensive assessment guide, it is the only book that provides a complete profile of a population group across clinical practice settings. Further, it includes a personal understanding of the traditions and customs of society, offering all health professionals a unique perspective on the implications for patient care. *Covid-19: A Critical Care Textbook - E-Book* Mar 27 2022 With the major redeployment of staff during the Covid-19 pandemic, this authoritative textbook provides a practical resource for healthcare professionals who may be new to acute and critical care settings. Written by nurses for nurses, the book will help readers master patient assessment, non-invasive ventilation, the use of high flow nasal oxygenation and renal care. You will learn about the challenges of resuscitation, leadership and responding to a public health emergency, and effective personal protection and hygiene practices. Covid-19: Critical Care textbook has been written by experts with frontline experience of working in hospitals during the pandemic and will remain relevant for those responding to future infectious disease outbreaks or waves of Covid-19. Self-assessment quizzes to support ongoing learning Suitable for staff re-deployed and those already working in acute and critical care areas Fully illustrated to demonstrate the use of PPE and coronavirus-specific procedures Contributions from key experts who have dealt directly with the disease provide practical insights

Textbook of Interdisciplinary Pediatric Palliative Care Sep 20 2021

The Textbook of Interdisciplinary Pediatric Palliative Care, by Drs. Joanne Wolfe, Pamela Hinds, and Barbara Sourkes, aims to inform interdisciplinary teams about palliative care of children with life-threatening illness. It addresses critical domains such as language and communication, symptoms and quality of life, and the spectrum of life-threatening illnesses in great depth. This comprehensive product takes a first-of-its-kind team approach to the unique needs of critically ill children. It shows how a collaborative, interdisciplinary care strategy benefits patients and their families. If you deal with the complex care of critically ill children, this reference provides a uniquely integrated

perspective on complete and effective care. Respect interdisciplinary perspectives, and provide the most comprehensive care. Use an integrated approach to address the physical, psychological, social, and spiritual needs of children and their families. Understand and heed your strengths and vulnerabilities in order to provide the best care for your patients. Recognize the necessity of linking hospital-based palliative care with community resources. Implement consistent terminology for use by the entire palliative care team. Access the full text online with regular updates and supplemental text and image resources. Reflects the collaborative approach necessary to provide optimal care for children and their families

Textbook of Neurointensive Care Mar 15 2021 This updated and refined new edition is the only book to provide a comprehensive approach to the intensive care of neurologically injured patients from the emergency room and ICU through the operating room and post-surgical period. It reviews neuroanatomy, neuroradiology, and neurophysiology, examines the neurological problems most frequently seen in intensive care, and describes the various types of neurosurgery. General issues are discussed, such as cardiac care, fluids and electrolytes, nutrition, and monitoring as well as more specific conditions and complications including elevated intracranial pressure, seizures, and altered mental states.

The Textbook of Health and Social Care Nov 03 2022 A comprehensive textbook designed to guide students through the entirety of a Health and Social Care BSc degree. Covering the important topics and pressing issues relevant to Health and Social Care today. The book's three part structure starts with the essential areas and core knowledge, including the sociology and psychology of illness, the research process, key legal and ethical issues and reflective practice. The second part covers aspects of health and social care in practice, like health promotion, safeguarding children and their rights, and working with people experiencing mental health disorders. Finally, the third part considers some of the challenges faced in present day health and social care, looking at social justice issues, legal and ethical considerations,

leadership, and health inequalities. All content is supported by practical and reflective features to help students throughout their degree, these include: interactive activities, real life case studies and examples related to chapter content, links and suggestions for further reading, and answers to key activities and case study exercises. The perfect companion text for anyone studying a Health and Social Care degree, or any other course related to the health and social care services.

Oxford Textbook of Critical Care Jun 29 2022 Now in paperback, the second edition of the Oxford Textbook of Critical Care is a comprehensive multi-disciplinary text covering all aspects of adult intensive care management. Uniquely this text takes a problem-orientated approach providing a key resource for daily clinical issues in the intensive care unit. The text is organized into short topics allowing readers to rapidly access authoritative information on specific clinical problems. Each topic refers to basic physiological principles and provides up-to-date treatment advice supported by references to the most vital literature. Where international differences exist in clinical practice, authors cover alternative views. Key messages summarise each topic in order to aid quick review and decision making. Edited and written by an international group of recognized experts from many disciplines, the second edition of the Oxford Textbook of Critical Care provides an up-to-date reference that is relevant for intensive care units and emergency departments globally. This volume is the definitive text for all health care providers, including physicians, nurses, respiratory therapists, and other allied health professionals who take care of critically ill patients.

Oxford Textbook of Palliative Care for Children Jul 31 2022 The importance of palliative care for children facing life threatening illness and their families is now widely acknowledged as an essential part of care, which should be available to all children and families, throughout the child's illness and at the end of life. The new edition of the Oxford Textbook of Palliative Care for Children brings together the most up to date information, current knowledge, evidence, and developments of clinical practice in the field. The book is structured into four sections. 'Foundations of Care' describes core issues, the foundations on which

paediatric palliative care is based. 'Child and Family Care' looks at different aspects of psychological, social, and cultural care for the sick child or young person, and their family. These chapters cover the time course of the illness, around the time of death and support for the bereaved family. 'Symptom Care' focuses on the uses of medication, specific symptoms, and their management. Finally, 'Delivery of Care' examines practical approaches to care in different environments and the needs of clinicians. Two new editors join the team from Canada and South Africa, reflecting our aims to contribute towards the development of care for children across the world, and to be a resource for both experienced clinicians and those new to the field. Comprehensive in scope, exhaustive in detail, and definitive in authority, this third edition has been thoroughly updated to cover new practices, current epidemiological data, and the evolving models that support the delivery of palliative medicine to children. This includes two new chapters, looking in detail at 'Decision Making' and 'Perinatal Care', and a new section highlighting the emerging importance of 'Palliative Care for Children in Humanitarian Crises'. This book is an essential resource for anyone who works with children worldwide.

Interdisciplinary Pediatric Palliative Care Jan 01 2020 "We hope that the lives of all children will be filled with possibility, with open horizons and rainbows into the future. Children with serious illnesses, their families, and those who care for them, confront the realization that "not everything is possible," that despite dramatic scientific and medical advances, the lifespan of some children will be shortened. This threat of premature loss heightens the sense of time for children and families alike, and challenges clinicians to create new pathways of hope for them"--

Textbook of Critical Care Jun 05 2020 A completely new editorial team presents a radical revision to this leading critical care text, previously edited by Shoemaker et al. The New Edition delivers today's best coverage of both adult and pediatric critical care, with contributions from an roster of world experts. In addition to numerous new chapters and many extensively rewritten ones, it features a completely new

section on commonly encountered problems and a new, more user-friendly organization. Presents only the most essential references within the text, with the rest provided on the enclosed CD-ROM.

The MASCC Textbook of Cancer Supportive Care and Survivorship

Jul 19 2021 This book is intended for medical students, residents, and fellows, as well as medical oncologists, radiation oncologists, surgeons, general practitioners, nurses and allied health workers. Complete with case vignettes, key points, and sidebar summaries to further assist readers using practical tips and tricks, this textbook provides current information on the management and prevention of cancer-related side effects, referring to up-to-date sources that are useful for conducting further research. It also introduces new topics, such as financial toxicity and complementary medicine, as well as covering the new side effects of targeted therapies not covered in the last edition. Additionally, MASCC Textbook of Cancer Supportive Care and Survivorship, 2nd edition assembles international, multidisciplinary experts who focus on a comprehensive range of symptoms and side effects associated with cancer and its treatment. Over the last five years, much progress has been made in supportive care, helping people cope with the symptoms of cancer and cancer treatment and addressing the physical and psychosocial matters of survivorship prior to, during, and after anticancer treatment. This is central to a patient's wellbeing and the MASCC Textbook of Cancer Supportive Care and Survivorship, 2nd edition, explores not only the diagnosis and treatment, but also the increasingly recognized complex and ongoing symptoms experienced by long term cancer survivors. Significant advances have been made, designing strategies to manage the side effects and symptoms of treatment and to prevent them from occurring, maximizing the person's ability to pursue daily activities. Reviews of the 1st edition: "This book reviews the management of cancer symptoms in patients and the side effects and late effects of treatment. The focus of the book is on supportive care and survivorship of cancer patients...The book covers symptomatology, medication and treatment, and system function of patients undergoing chemotherapy or radiation therapy...Photographs

and algorithm charts further illustrate key points. This outstanding book is thorough in its explanations and easy to follow.” (Arlenda C. Thompson, Doody’s Review Service, January, 2011)

Comprehensive Care of Schizophrenia Sep 08 2020 The second edition of this popular volume has been thoroughly updated, offering new information on the advances in research and management since the publication of the first edition a decade ago.

BTEC National Health and Social Care May 17 2021 These books provide your students with a strong and distinctive case study approach which will contextualise key issues with the Student Textbook for BTEC National Health and Social Care. Units covered: 1. Developing Effective Communication in Health and Social Care 2. Equality, Diversity and Rights in Health and Social Care 3. Health, Safety and Security in Health and Social Care 4. Development Through the Life Stages 5. Anatomy and Physiology for Health and Social Care 6. Personal and Professional Development in Health and Social Care 7. Sociological Perspectives for Health and Social Care 8. Psychological Perspectives for Health and Social Care

Oxford Textbook of Public Health Palliative Care Dec 24 2021 Death, dying, loss, and care giving are not just medical issues, but societal ones. Palliative care has become increasingly professionalised, focused around symptom science. With this emphasis on minimizing the harms of physical, psychological, and spiritual stress, there has been a loss of how cultures and communities look after their dying, with the wider social experience of death often sidelined in the professionalisation and medicalisation of care. However, the people we know and love in the

places we know and love make up what matters most for those undergoing the experiences of death, loss, and care giving. Over the last 25 years the theory, practice, research evidence base, and clinical applications have developed, generating widespread adoption of the principles of public health approaches to palliative care. The essential principles of prevention, harm reduction, early intervention, and health and wellbeing promotion can be applied to the universal experience of end of life, irrespective of disease or diagnosis. Compassionate communities have become a routine part of the strategy and service development in palliative care, both within the UK and internationally. The Oxford Textbook of Public Health Palliative Care provides a reframing of palliative care, bringing together the full scope of theory, practice, and evidence into one volume. Written by international leaders in the field, it provides the first truly comprehensive and authoritative textbook on the subject that will help to further inform developments in this growing specialty.

Level 3 Diploma in Health and Social Care Textbook Jan 13 2021 No further information has been provided for this title.

Textbook of Acute Trauma Care Oct 10 2020 This book provides a systemic approach to acute trauma care in line with the ABCDE paradigm and up-to-date information on assessing and managing major trauma from the pre-hospital to the rehabilitation phase. The book's early sections are dedicated to identifying and managing pathology caused by massive haemorrhage, airway, breathing, circulation or neurological trauma and examining the current evidence base relating to their management. The book then builds from fundamental skills to advanced interventions so that each level of responder can identify and implement aspects of clinical practice that will be of benefit to them at their stage. This approach also explains advanced interventions that may be executed subsequently, explaining how each phase of care sits together. This has a further benefit of producing seamless care for patients by practitioners of different levels using this book as a reference point. Later sections deal with specifics of in-hospital trauma care by specialty, including the explanation of decision making processes by specialties, use of

diagnostic and interventional radiology, rehabilitation and psychological aspects of trauma care. The Textbook of Acute Trauma Care also focuses on non-clinical issues relevant to trauma such as training and logistics of retrieval and repatriation, aviation considerations in HEMS, legal and forensic evidence considerations and ethical issues dealing with trauma patients. In addition, the book contains chapters from international experts on cognitive and human factors relating to healthcare and suggests strategies for training and minimising errors. This book is an essential resource for all grades of practitioner, from first responders to Consultant/Attending Physician level providers.

Workbook for Providing Home Care Aug 27 2019

The City & Guilds Textbook Level 5 Diploma in Leadership and Management for Adult Care Jun 25 2019

Toohey's Medicine Apr 27 2022 In spite of recent changes in nurse education, nurses still need to know about medicine to understand their work with patients. This is the latest edition of what has become a popular and enduring nursing textbook. It is a short textbook of medicine written by medical experts, but read by nurses. Nurses have consistently found this book invaluable because of the level at which the text is pitched. It has been written in consultation with nurses and covers exactly the medical knowledge that they require. These features make it still an ideal medical text for nurses: Includes the medical knowledge nurses need New team of contributors to widen input Written in consultation with nurses to ensure appropriateness of information New format and typeface - to increase readability

The Care and Wellbeing of Older People Mar 03 2020 The Care and Wellbeing of Older People is aimed at all those training and taking courses relating to the healthcare of older people. This could mean pre- and post-registration students in universities and colleges as well as practitioners in hospitals and care homes. The book will relate to UK standards and competencies (e.g. Skills for Health and Skills for Care competencies) relating to the care and wellbeing of Older People. The book is suitable for students in Scotland, England, Wales and Northern Ireland. Student learning is supported by case studies, activities, a

glossary, references and further reading. Covering a wide range of topics in primary and secondary care, this contributed volume provides a comprehensive exploration of the current issues and challenges involved in the care of older people. With a focus on the user's experience of care and the implications for joint working, the textbook includes chapters on subjects such as: Values; Communication; Advocacy and rights; Interprofessional working; Protecting vulnerable adults; Promoting physical and mental health and wellbeing; Life in care; Palliative care; Social networks. Foreword by Priscilla Ebersole, RN, PhD, FAAN, Professor Emerita, San Francisco State University, San Francisco, CA, USA.

Fundamentals of Nursing Care Jun 17 2021 "Fundamentals of Nursing Care" is a foundation level "pre-registration text that focuses on the fundamental principles of caring.

Covid-19: A Critical Care Textbook - E-Book Nov 10 2020 With the major redeployment of staff during the Covid-19 pandemic, this authoritative textbook provides a practical resource for healthcare professionals who may be new to acute and critical care settings. Written by nurses for nurses, the book will help readers master patient assessment, non-invasive ventilation, the use of high flow nasal oxygenation and renal care. You will learn about the challenges of resuscitation, leadership and responding to a public health emergency, and effective personal protection and hygiene practices. Covid-19: Critical Care textbook has been written by experts with frontline experience of working in hospitals during the pandemic and will remain relevant for those responding to future infectious disease outbreaks or waves of Covid-19. Self-assessment quizzes to support ongoing learning Suitable for staff re-deployed and those already working in acute and critical care areas Fully illustrated to demonstrate the use of PPE and coronavirus-specific procedures Contributions from key experts who have dealt directly with the disease provide practical insights

A Textbook of Perioperative Care Jan 25 2022 Woodhead and Wicker's new text will be the foremost reference source for all perioperative practitioners. The content mirrors the dynamics of modern

perioperative practice by focusing on surgical interventions in all the environments in which it is currently practised, including A&E departments, general practice clinics, intensive care units, and at the site of serious accidents. Theatre practice is becoming increasingly specialist; this book does not attempt to reflect the needs of all specialties, but instead concentrates on the principles of practice, applicable to any setting and any specialty. It has a very practical focus - it aims to be the book that nurses and ODPs reach for in order to answer their practical questions - but is not procedure-driven. Instead, it sets out the principles of perioperative practice, from which practitioners will be able to develop their own practice techniques. Reflects principles of practice, applicable to any perioperative environment Strong practical focus Edited by two of the biggest 'names' in the international perioperative nursing sphere, with contributions from other well-known and authoritative sources Excellent opportunities to develop links with the National Association of Theatre Nurses and the European Operating Room Association The team of contributors are experienced practitioners working directly with perioperative patients or in perioperative education An original model for ethical practice is proposed: the Reid model is the first such ethical model to be proposed for the perioperative environment Includes one of the only chapters in any perioperative book which specifically focuses on the care of the elderly. The research chapter encourages the use of evidence based practice and the development of perioperative research The unique chapter on care of the mentally ill will support practitioners who are not qualified in psychiatry to care for mentally ill patients. This is an area where there is a great information deficit Key points listed for each chapter Sections have been completely revised from previous edition - key subject areas now stand-alone chapters rather than sections within much larger chapters - creates ease of access for user Change of editorship Recognises the diversity of perioperative environments much more explicitly than previous edition

Advanced Health and Social Care for NVQ Level 4 and Foundation Degree Apr 15 2021 Including information on quality management and

promoting health and wellbeing, this text also covers other relevant issues in the field.
