Pupils need experience in deciding and documenting their answers efficiently. They need total familiarity with the spectrum of multiple choice questions, and with the layout of question papers and response sheets. The Eureka! 11+ Confidence series of Exam Papers provides: Question papers laid out in modern, multiple-choice format Answer sheets laid out in modern format (in places requiring digit-by-digit entry) Full answers with explanations Supplementary books giving very detailed methods, tips and tricks on the more challenging aspects of Numerical Reasoning In supporting your child's preparation for the exam: Do as much exam paper practice as possible. Variety helps retain attention. Cut out the multiple choice answer sheet and use it to record the answers. Maximizing authenticity now minimizes exam-day anxiety. Do these practice exams formally: seated alone, away from television and radio. Immediately afterwards, encourage the pupil to mark their own work. Insist on discussing the questions which were not answered correctly. Do not set aside any errors as "silly mistakes." All mistakes are silly. The key to 11+ is attention to seemingly small details. Doing exam papers is a learning opportunity. Underline the importance of discovering how errors were made and how they may be prevented in future. Tips, tricks and (most of all) systematic approaches for avoiding the major traps at 11+ are given in the associated "Eureka! Challenging Maths and Numerical Reasoning Exam Questions for 11+ " series of books. Thoughtful support from parents can be crucial for pupils in the run-up to examinations. Use the Eureka! Seven Myths About Education Oct 11 2020 In this controversial new book, Daisy Christodoulou offers a thought-provoking critique of educational orthodoxy. Drawing on her recent experience of teaching in challenging schools, she shows through a wide range of examples and case studies just how much classroom practice contradicts basic scientific principles. She examines seven widely-held beliefs which are holding back pupils and teachers: - Facts prevent understanding - Teacher-led instruction is passive - The 21st century fundamentally changes everything - You can always just look it up -We should teach transferable skills - Projects and activities are the best way to learn - Teaching knowledge is indoctrination. In each accessible and engaging chapter, Christodoulou sets out the theory of each myth, considers its practical implications and shows the worrying prevalence of such practice. Then, she explains exactly why it is a myth, with reference to the principles of modern cognitive science. She builds a powerful case explaining how governments and educational organisations around the world have let down teachers and pupils by promoting and even mandating evidence-less theory and bad practice. This blisteringly incisive and urgent text is essential reading for all teachers, teacher training students, policy makers, head teachers, researchers and academics around the world.

11+ Super Selective Maths Mar 16 2021 The 11+ Super Selective MATHS series has been written especially for children who seek 'more than ordinary' mathematical challenges. Filled with questions designed to stimulate thinking rather than simply elicit learned responses, this series provides the challenge that able pupils seek. Selective UK secondary schools are increasingly developing entrance exams that test potential rather than coached learning. As such we do not offer any particular exam format (e.g. CEM Durham, GL Assessment). Instead children's learning will be brought to life by our questions that demand insight and grasp of the fundamental concepts underlying each problem. Our fully worked answers demonstrate different strategies for solving 11+ mathematical challenges. Attractively designed and with ample space inside for pupils to express their working, this series will lead pupils to discover the fun, beauty and elegance of Mathematics! Each book in the 11+ Super Selective MATHS series - Contains 30 stimulating numerical and mathematical reasoning challenges Provides advanced practice material in mathematical thinking at 11+ Includes fully worked answers & explanations Is suitable for use at the very top end of Key Stage 2 and at Key Stage 3 Is suitable for practice for scholarship exams and at 13+"
