has a dynamic hockey history that dates back 80 years, beginning with the Springfield Indians. One of the first professional hockey teams in the United States, the Indians were an inaugural member of the Canadian-American Hockey League. The Indians helped form the American Hockey League, where Springfield won seven Calder Cups, including a record three in a row from 1960 through 1962. Major-league hockey followed in the mid-1970s, when the New England Whalers came to town. Today, the Springfield Falcons carry on the city's great hockey legacy. Several hall

of famers have skated for Springfield-based teams over the years, including Gordie Howe, Brian Kilrea, Chuck Rayner, Earl Seibert, Eddie Shore, Billy Smith, and Lorne "Gump" Worsley. Hockey in Springfield is the story of the teams, players, and coaches who make up one of the richest hockey traditions in all of North America.

Management Apr 15 2021 This text maintains its coverage of management theories and concepts while delivering current thinking in management practices and ideas

in the late 1990s. Through its core competency paradigm, students evaluate their own experiences with business management. This development framework focuses on ways for students to develop six managerial competencies they will need to become effective managers: communication; planning and administration; strategic action; self-management; global awareness; and teamwork.

Handbook of Distance Education Jun 05 2020 The second edition of this award-winning book continues the mission of its predecessor, to provide a comprehensive compendium of research in all aspects of distance education, arguably the most significant

development in education over the past quarter century. While the book deals with education that uses technology, the focus is on teaching and learning and how its management can be facilitated through technology. This volume will be of interest to anyone engaged in distance education at either the K-12 or college level. It is also appropriate for corporate and government trainers and for administrators and policy makers in all these environments.

The Great Ordovician Biodiversification Event Aug 08 2020 Two of the greatest evolutionary events in the history of life

on Earth occurred during Early Paleozoic time. The first was the Cambrian explosion of skeletonized marine animals about 540 million years ago. The second was the "Great Ordovician Biodiversification Event," which is the focus of this book. During the 46-million-year Ordovician Period (489--443 m.y.), a bewildering array of adaptive radiations of "Paleozoic- and Modern-type" biotas appeared in marine habitats, the first animals (arthropods) walked on land, and the first non-vascular bryophyte-like plants (based on their cryptospore record) colonized terrestrial areas

with damp environments. This book represents a compilation by a large team of Ordovician specialists from around the world, who have enthusiastically cooperated to produce this first globally orientated, internationally sponsored IGCP (International Geological Correlation Program) project on Ordovician biotas. The major part is an assembly of genus- and species-level diversity data for the many Ordovician fossil groups. The book also presents an evaluation of how each group diversified through Ordovician time, with assessments of patterns of change

and rates of origination and extinction. As such, it will become the standard work and data source for biotic studies on the Ordovician Period. Books in Print Mar 15 2021 Educational Rankings Annual 2000 Nov 03 2022 This up-to-date resource presents 3,500 national, regional, local and international lists and rankings compiled from hundreds of sources. Entries for rankings typically include a description of the ranking; background information on criteria for establishing the hierarchy; additional remarks about the ranking; the complete or

partial (if extensive) ranking; and a complete source citation for locating more information if necessary.

Arthuriana Jul 07

2020 The legends
of King Arthur have
not only endured
for centuries, but
also flourished in
constant retellings
and new stories
built around the
central themes.

With the coming of
motion pictures,
Arthur was destined
to hit the screen.

This edition of
Cinema Arthuriana,
revised in 2002,
presents 20 essays
on the topic of the
recurring presence

of the legend in film
and television from
1904 to 2001. They
cover such films as
Excalibur (1981)
and Monty Python
and the Holy Grail
(1975), television
productions such as
The Mists of Avalon
(2001), and French
and German films
about the quest for
the Holy Grail and
the other
adventures of King
Arthur and the
Knights of the
Round Table.

**Long-term
Ecological
Change in the
Northern Gulf of
Alaska** Sep 28
2019 This
comprehensive text
is a major synthesis
on ecological
change in the Gulf
of Alaska. It
encompasses the
structural and
annual changes,
forces of change,
long-ecological
changes in the
atmosphere and
ocean, plankton,
fish, birds and
mammals, and the
effects of the 1989

Exxon Valdez Oil
Spill. With 5 major
sections, Long-term
Ecological Change
in the Northern
Gulf of Alaska first
describes the
physical features,
the atmosphere and
physical
oceanography, the
annual production
cycle, the forage
base for higher
animals and trophic
transfer, and the
adaptations for
survival in this
changing
environment for 9
portal species.
Then, the major
forces of change
are introduced:
climate, geophysics,
fisheries and
harvesting, species
interactions,
disease and
contaminants. Next,
the long-term
records of change
in physical factors
and biological

populations are presented, as well as the potential reasons for the biological changes. Following is the history of the Exxon Valdez oil spill and its long-term effects. And, finally, the emergent properties of the ecosystem are discussed and an attempt is made to weigh the importance of the major forcing factors in terms of their temporal and spatial scales of influence. * Examines important data on long-term change in the ecosystem and the forcing factors that are responsible for it * Provides an account of the 1989 Exxon Valdez oil spill with emphasis on the long-term effects * Describes

the effects of climate change, geophysical change, species interactions, harvesting, disease, the 1989 oil spill, and marine contaminants on key populations of marine organisms

An International Annotated Bibliography of Strindberg Studies 1870-2005: The plays May 05 2020
This copiously annotated bibliography documents and examines the whole range of commentary on Strindberg's works and activity in many fields besides the plays for which he is internationally best known. These include his prose fiction and poetry, his work as an historian and natural historian, and his relationship to the other arts, most notably his painting. It is

concerned with both lasting works of literary and dramatic criticism, as well as reviews of his books and plays in the theatre, and some more ephemeral material, all of this in several languages. Organised generically and by subject and individual work, the bibliography enables the reader to trace the changing impact of Strindberg and his works in various countries and during different periods. It is thus very much a study in reception as well as a bibliographical record of published material. It traces the developing image of Strindberg and his writing both during his lifetime and in subsequent

years, and with frequent cross reference offers a comprehensive overview of a literary and existential project that has rarely been matched for its multifaceted diversity. The bibliography is published in three parts. Volume 1, General Studies (978-0-947623-81-4) and Volume 3, Prose, Poetry, Miscellaneous (978-0-947623-83-8) are also now available.
