Systematic Psychiatric Evaluation Sep 19 2019 The Perspectives approach to psychiatry focuses on four aspects of psychiatric practice and research: disease, dimensional, behavior, and lifestory. In Systematic Psychiatric Evaluation, Drs. Margaret S. Chisolm and Constantine G. Lyketsos underscore the benefits of this approach, showing how it improves clinicians' abilities to evaluate, diagnose, and treat patients. Drs. Chisolm and Lyketsos use increasingly complex case histories to help the mental health provider evaluate patients demonstrating symptoms of bipolar disorder, psychosis, suicidal ideation, depression, eating disorders, and cutting, among other conditions. The book also includes an exercise that simulates the Perspectives approach side by side with traditional methods, revealing the advantages of a method that engages not one but four points of view. Featuring a foreword by Drs. Paul R. McHugh and Phillip R. Slavney, the originators of the Perspectives approach, this innovative book will be used in psychiatric training programs as well as by practicing mental health clinicians. -- Arnold E. Andersen, M.D., The University of Iowa College of Medicine

Fearless Creating Jun 21 2022 For writers, painters, or performers in any field, new hope for overcoming creative blocks and finishing the art of their dreams. The blank page, empty canvas, or uncarved stone will often fill artists with dread. But so may the thought of finishing, showing, or even selling their work. It is in this "artistic anxiety" that creative blocks begin. With an understanding that could only be gained through years of experience in counseling artists, writers, and performers, Eric Maisel, Ph.D. discusses each stage of creation-wishing, choosing, starting, working, completing, selling--and the anxieties particular to each. He then shows how these inhibiting tensions can be turned to artistic advantages, how truth and beauty arrive in the work of art precisely because, and only when, anxiety has been understood, embraced, and resolved. Fearless Creating guides the reader, whether an experienced artist or someone just starting out, past the pitfalls that appear in each stage of the process. By following Dr. Maisel's exercises related both to the world at hand and the ongoing struggles of artistic life, readers will emerge from this book with a completed work of art and a new perspective on their potential to be a fearless creator.

The Writing Process Aug 19 2019 Writing is more than a way to record sentences we've already shaped in our heads. As someone famously said, that's just typing. This book will help you develop an approach that includes the thinking part of writing. A series of logical steps will lead you from idea (or assignment) to finished written work. It answers some basic questions that every writer faces: How do I get organized? What do I do first? What next? How do I evaluate my drafts? How about word choice? When have I said enough? How should I end? Designed to help almost any writer, The Writing Process is also an excellent tool for teachers of writing, as well as for parents who want to give their youngsters an extra boost.

A Step-by-Step Guide to Conducting an Integrative Review Apr 07 2021 This book provides guidance to readers for how to conduct an integrative review. Over the decades, with the expansion of evidence-based practice (EBP), the evolution of methods used in reviews has resulted in a wide spectrum of review types. Due to the overlapping characteristics of the various review methods, confusion exists related to terminology, descriptions and methods of each type. To fill this gap, this book examines components necessary to conduct a rigorous integrative review from formulating questions through dissemination of the results of the review. Each chapter focuses on one component or step in this process and is written in a straightforward and readable manner. An integrative review is considered by many as an actual research study, hence it should be approached following established research methods involving well-defined steps. The integrative review is often compared with the systematic review. Both are used in healthcare research and follow a systematic process in reviewing literature and developing recommendations, but there are important differences that are addressed in the book. Evidence-based practice (EBP) demands high quality, rigorous evidence for nurse clinicians to make informed decisions with and for their patients. In nursing education, the integrative review is a frequent capstone project for graduate students and forms the basis for many doctoral projects. The Integrative review process should be valid, reliable and transparent and this book provides clear guidelines for writing an integrative review for students, educators, clinicians, and researchers. This book is a useful addition to courses for both undergraduate and graduate level writers of integrative reviews. In academia, a likely adoption would be in graduate research and research methods courses, and baccalaureate honor courses.

Supporting Behavior for School Success Aug 31 2020 Designed for busy teachers and other school-based professionals, this book presents step-by-step guidelines for implementing seven highly effective strategies to improve classroom management and instructional delivery. These key low-intensity strategies are grounded in the principles of positive behavior intervention and support (PBIS), and are easy to integrate into routine teaching practice. Chapters discuss exactly how to use each strategy to decrease disruptive behavior and enhance student engagement and achievement. Checklists for success are provided, together with concise reviews of the evidence base and ways to measure outcomes. Illustrative case examples span the full K-12 grade range. Reproducible intervention tools can be downloaded and printed in a convenient 8 1/2" x 11" size. See also *Managing Challenging Behaviors in Schools*, by Kathleen Lynn Lane et al., which shows how these key strategies fit into a broader framework of prevention and intervention.

Doing Your Child Observation Case Study May 20 2022 Observation of young children, their development, and planning for next steps is a fundamental requirement of early years practice. Awareness of appropriate techniques, understanding what you are observing, as well as what it all means in terms of planning for learning is an essential yet difficult skill to acquire. This is a very practical book on observing young children that supports you in preparing a child observation case study. Taking a step-by-step approach the book covers the whole process beginning with choosing a child to study before discussing the fundamentals of child observation. It includes invaluable guidance on: The ethics of your study Appropriate techniques and tools for gathering data Observations that are useful How to select material to include Analyzing or interpreting the information Potential pitfalls The book includes many examples of good observations, which help show how your own observations can be evaluated, analyzed and used. In addition there is a fully worked example of a child observation case study in the penultimate chapter. If you are studying early years or early childhood studies at foundation, undergraduate or Master's degree level then this book will really help you get to grips with how a good child observation study unfolds and develops. Cath Arnold works at the Pen Green Centre, an internationally renowned Children's Centre in Corby, UK. She is author of Observing Harry (Open University Press 2003). This is a fascinating and accessible new book on child observation case study for students and professionals. Cath Arnold integrates theoretical perspectives and practical examples of observations with remarkable clarity in this comprehensive guidance to child case study. Shirley Allen, Senior Lecturer Early Childhood Studies, Middlesex University It is quickly evident to the reader that 'Doing Your Child Observation Case Study' is steeped in the expertise and extensive experience of its author. The practical guidance it offers is likely to prove invaluable for childhood studies students and early career researchers in the field. Yet Cath Arnold's 'step-by-step guide' goes far beyond the practical. She shines vital light on the complex nuances of values, beliefs, ethics and rights inherent in child case study and addresses with clarity and credibility the crucial role that theory can play in supporting our understanding of children's actions. This text is an excellent addition to the childhood studies bookshelf. Dr Jane Murray, Centre for Education and Research, University of Northampton, UK Cath Arnold has provided a rich resource for those who want to understand more about children, their wellbeing and their learning. This detailed approach to child observation offers guidance on why, how and what to observe, and how to interpret what is observed. Rich in examples collected over many years 'Doing your Child Observation Case Study' will get many early years practitioners started on their own learning journeys as they watch and engage with young children to develop detailed impressions of children's development. Professor Cathy Nutbrown, Head of The School of Education, The University of Sheffield In this new book Cath is once more supporting early childhood educators to engage in the strong UK tradition of child observations; the tradition of Piaget, Novara, Darwin and Susan Isaacs. She has developed her own understanding of the importance of observational studies building on the giants whose shoulders we all stand on. This powerful publication combines insights into both the theory and practice of developing child observations in an early years setting. Cath demonstrates how detailed and powerful records of children's learning and development speak to practitioners and hold their value over time in a world where early educators are increasingly obliged to devote enormous amounts of their energy filling in forms, schedules and are hard pressed to reject the pressure of tick box developmental checks and imposed tracking schemes. This book lights the way to a much deeper way of documenting children's learning and development. As educators we need to match children's learning with rich curriculum content and this book reminds us that we can only achieve this critical pedagogical task if we have closely watched what it is that excites and interests each individual child. 'Doing Your Child Observation Case Study' shows us the way to be well informed practitioners able to offer children a really rich learning experience. Dr. Margy Whalley, Director of the Research, Development and Training Base at the Pen Green Centre and Centre for Children and their Families

The Ultimate Art of War Jan 24 2020 This is the most accessible edition of Art of War ever produced, with the text broken down into digestible individual lessons, unique teaching illustrations to clarify the text, and step-by-step commentary that draws on the full range of recent translations and ancient commentators. Composed in the 5th century BC, Sun Tzu's Art of War is the earliest-known treatise on military strategy, and is still hugely popular around the world for its perceptive tactical advice to commanders on how to win at war with minimal bloodshed. Aimed at all those who want to study the text in depth, this is the first step-by-step guide to the famous treatise, breaking down the 13 chapters of the original into 200 easily digested lessons, from 'do not press a desperate enemy' to 'control your troops through bond of loyalty' to 'when you are weak, beware attack', all accompanied by comprehensive commentary and clarified with around 250 illustrations. Making the lessons even more memorable and easy to understand, the black/red illustrations include strategic diagrams, evocative line drawings and beautiful calligraphy. This ultimate guide to Art of War includes the classic 1910 translation by Lionel Giles and commentary that takes into account all academic interpretations of the text, highlighting differences between modern translations as well as the perspectives of historical Chinese commentators. No other edition compares and contrasts the viewpoints of different contemporary translators, or explains exactly what each section of this often enigmatic text actually means.

A Step-by-Step Guide to Case-Based Collaborative Learning (CBCL) Jan 16 2022 This book is about Case-Based Collaborative Learning (CBCL) for medical educators. CBCL combines elements from team-, case- and problem-based based learning using a flipped classroom model. This book presents a detailed “how to” guide on how to create CBCL classroom materials, how to facilitate vivid discussions, and how to support students and faculty in a CBCL curriculum. The first chapter explores the CBCL method in context of established educational principles. The second chapter provides a step-wise guide to creating CBCL teaching materials from scratch or adapting existing resources. Chapter three discusses how to support both - faculty and students - in making the most out of in-class case discussions. The last chapter explores modifications to the CBCL method that have evolved over time in adapting to teaching remotely, as well as promoting self-directed learning skills in students. While originally developed in context of undergraduate medical education, the CBCL method is of interest to anyone in higher education that values flipped classroom methods and discussion-based teaching.
