Technology and Society, second edition Nov 18 2021 Writings by thinkers ranging from Rokeya Sakhawat Hossain to Bruno Latour that focus on the interconnections of technology, society, and values. Technological change does not happen in a vacuum; decisions about which technologies to develop, fund, market, and use engage ideas about values as well as calculations of costs and benefits. In order to influence the development of technology for the better, we must first understand how technology and society are inextricably bound together. These writings--by thinkers ranging from Bruno Latour to Francis Fukuyama--help us do just that, examining how people shape technology and how technology shapes people. This second edition updates the original significantly, offering twenty-one new essays along with fifteen from the first edition. The book first presents visions of the future that range from technological utopias to cautionary tales and then introduces several major STS theories. It examines human and social values and how they are embedded in technological choices and explores the interesting and subtle complexities of the technology-society relationship. Remediating a gap in earlier theorizing in the field, many of the texts illustrate how race and gender are intertwined with technology. Finally, the book offers a set of readings that focus on the sociotechnical challenges we face today, treating topics that include cybersecurity, geoengineering, and the myth of neutral technology.

[The Short Life and Long Times of Mrs. Beeton](#) Feb 27 2020 A portrait of the life and times of the domestic diva of Victorian England profiles Isabella Beeton, the woman behind Mrs. Beeton's Book of Household Management, a period collection of recipes and domestic advice, and explores the remarkable legacy of the volume. 25,000 first printing.

Magnetic Field(s) Feb 09 2021 Organized around the idea that "you can't know what a magnetic field is like unless you're inside of it," Ron Loewinsohn's first novel opens from the disturbing perspective of a burglar in the midst of a robbery and travels through the thoughts and experiences (both real and imaginary) of a group of characters whose lives are connected both coincidentally and intimately. All of the characters have a common desire to imagine and invent rather horrifying stories about the lives of people around them. As the novel develops, certain phrasings and images recur improbably, drawing the reader into a subtle linguistic game that calls into question the nature of authorship, the ways we inhabit and invade each other's lives, and the shape of fiction itself.

The Conscious Cook Sep 16 2021 THE CONSCIOUS COOK is a breakthrough in vegan cuisine. By teaching readers how to make truly satisfying and delicious meals without the meat and dairy, it makes the shift to a vegan lifestyle easy. A former steak lover himself, Chef Tal struggled for years on a vegan diet that left him hungry and filled with cravings for butter and meat. About ten years ago, he decided that the best way to satisfy his dietary desires was to make food that was good enough for "foodies" and could gratify his cravings for rich flavor and fat. The solution? Create vegan meals with substantial proteins that could literally change the way people eat. He studied all aspects of non-meat proteins and today is widely regarded as the expert in the field, developing new concepts for meals and sauces and helping to improve textures for food companies such as Gardein (the provider of vegetable proteins used by Morningstar Farms, It's All Good, Trader Joe's brands, and the prepared food department of Whole Foods, to name a few). THE CONSCIOUS COOK features a center-of-the-plate protein in all of its entrees--a first for vegan cookbooks. Seventy-five original recipes are organized by categories that include starters and small plates, soups and salads, entrees, and desserts. Each recipe is accompanied by stunning full-color photographs.

Henricks traces the development of sport and its interaction with society through five time periods: the feudal era, the later Middle Ages, and the Tudor, Stuart, and Georgian eras. The book also serves as an introduction to the historical literature on English sport, connects sport to broader social and cultural themes, and develops an original thesis of sport as an identity ceremony for generations of participants.

Shaping the Network Society Oct 17 2021 How computer professionals and communities can work together to shape sociotechnical systems that will meet society's challenges. Information and computer technologies are used every day by real people with real needs. The authors contributing to *Shaping the Network Society* describe how technology can be used effectively by communities, activists, and citizens to meet society's challenges. In their vision, computer professionals are concerned less with bits, bytes, and algorithms and more with productive partnerships that engage both researchers and community activists. These collaborations are producing important sociotechnical work that will affect the future of the network society. Traditionally, academic research on real-world users of technology has been neglected or even discouraged. The authors contributing to this book are working to fill this gap; their theoretical and practical discussions illustrate a new orientation—research that works with people in their natural social environments, uses common language rather than rarefied academic discourse, and takes a pragmatic perspective. The topics they consider are key to democratization and social change. They include human rights in the "global billboard society"; public computing in Toledo, Ohio; public digital culture in Amsterdam; "civil networking" in the former Yugoslavia; information technology and the international public sphere; "historical archaeologies" of community networks; "technobiographical" reflections on the future; libraries as information commons; and globalization and media democracy, as illustrated by Indymedia, a global collective of independent media organizations.

What is Architecture? Aug 03 2020 Discusses the meaning of architecture, describing its place in history, art and technology. Every Last Tie May 24 2022 In August 1995 David Kaczynski's wife Linda asked him a difficult question: "Do you think your brother Ted is the Unabomber?" He couldn't be, David thought. But as the couple pored over the Unabomber's seventy-eight-page manifesto, David couldn't rule out the possibility. It slowly became clear to them that Ted was likely responsible for mailing the seventeen bombs that killed three people and injured many more. Wanting to prevent further violence, David made the agonizing decision to turn his brother in to the FBI. *Every Last Tie* is David's highly personal and powerful memoir of his family, as well as a meditation on the possibilities for reconciliation and maintaining family bonds. Seen through David's eyes, Ted was a brilliant, yet troubled, young mathematician and a loving older brother. Their parents were supportive and emphasized to their sons the importance of education and empathy. But as Ted grew older he became more and more withdrawn, his behavior became increasingly erratic, and he often sent angry letters to his family from his isolated cabin in rural Montana. During Ted's trial David worked hard to save Ted from the death penalty, and since then he has been a leading activist in the anti-death penalty movement. The book concludes with an afterword by psychiatry professor and forensic psychiatrist James L. Knoll IV, who discusses the current challenges facing the mental health system in the United States as well as the link between mental illness and violence.

Rhode Island Blues Sep 23 2019 Weldon on top form; Weldon tackling love, sex, ageing, death; Weldon at her wittiest best; Weldon unparalleled. Sophia is a 34-year-old film editor living in Soho. Her only living relation (she thinks), her grandmother Felicity, is an 83-year-old widow (several times) living in smart Connecticut. Sophia is torn between her delight in her freedom and a nagging desire for the family ties which everyone else grumbles about: casual sex is all very well, but who do you spend Christmas with? Her current bed-mate seems to be in love with a glamorous Hollywood film star (not that Sophia cares, of course: she's a New Woman); her mad mother is dead. All she has is Felicity. But Felicity is not your average granny. Temperamental, sophisticated, chic (and alarmingly eccentric), she has seen much of life, love and sex and is totally prepared to see more. Even if it is from a twilight home (The Golden Bowl Complex for Creative Retirement)... Twilight is not at all Felicity's idea of fun; and quite possibly she has more idea of fun than her granddaughter. As the two women's stories unravel, the past rears up with all its grimness and irony: but points the way to a future which may redeem them bot

Writing at the End of the World Jun 13 2021 Richard E. Miller questions the current views of the relationship between the humanities and daily life, and proposes that, in the face of increasing violence, the humanities should become more important, not less.

The Anarchist Cookbook Jul 02 2020 The Anarchist Cookbook will shock, it will disturb, it will provoke. It places in historical perspective an era when "Turn on, Burn down, Blow up" are revolutionary slogans of the day. Says the author "This book... is not written for the members of fringe political groups, such as the Weatherman, or The Minutemen. Those radical groups don't need this book. They already know everything that's in here. If the real people of America, the silent majority, are going to survive, they must educate themselves. That is the purpose of this book." In what the author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There i detailed advice concerning electronics, sabotage, and surveillance, with data on everything from bugs to scramblers. There is a comprehensive chapter on natural, non-lethal, and lethal weapons, running the gamut from cattle prods to sub-machine guns to bows and arrows.

Guy Mannering Nov 06 2020 *Guy Mannering*, or *The Astrologer*, first published in 1815, was Walter Scott's second novel. *Guy Mannering* only half-believes in his art, but does believe in the ability of his patriarchal power, wealth and social position to sort out social confusion. However he has to learn the limits of a nabob's authority in a society that (in the 1780s) is no longer a single hierarchy but has many subsets, each with its own laws - gypsies, smugglers, Edinburgh lawyers, the Border store farmer, the traditional landowner. *Guy Mannering* is set at the time of the American Revolution, and represents a Scotland at once backward and advanced, patriarchal and commercial, traditional and modern, a country in very varied stages of progression. This is the first modern edition of one of Scott's finest works. It is

based on the first edition, but is corrected from the manuscript, and restores around two thousand readings lost through error or misunderstanding. For the first time it includes Scott's extended portraits of the Edinburgh literati which were unaccountably omitted from the printed version.

Theophilus of Antioch Jul 26 2022 Theophilus of Antioch was a second-century Syrian bishop who sought to promote in three books, collectively known as *Ad Autolyicum*, a moralistic form of Christianity. Given that this form of Christianity is generally considered by scholars as atypical within the early church, Theophilus has not received the same amount of attention as have other second-century theologians. Rick Rogers seeks to redress this gap, offering a fuller analysis of the rhetoric and focus of Theophilus's theological system as it is manifest in *Ad Autolyicum*. Rogers concludes that Theophilus's thought may have been closer to the emphasis of Hellenistic Judaism than was any other form of New Testament or early Christianity. His book will hold strong appeal for scholars and students of early Christianity.

The Private Memoirs and Confessions of a Justified Sinner Nov 25 2019 It is Scotland in the early 18th century. Fear and superstition grip the land. Robert Wringhim, a boy of strict Calvinist upbringing, is corrupted by a shadowy figure who calls himself Gil-Martin. Under his influence he commits a series of murders which he regards as "justified" by God under the tenets of his faith. Hogg's book is a brilliant portrayal of the power of evil, and a scathing critique of the organized religion. Superbly crafted and deftly executed, it resists any easy explanation of events; is this stranger a figment of Robert's imagination or the devil himself?

The Weight of Water Oct 05 2020 Armed with a suitcase and an old laundry bag filled with clothes, Kasienska and her mother head for England. Life is lonely for Kasienska. At home her mother's heart is breaking and at school friends are scarce. But when someone special swims into her life, Kasienska learns that there might be more than one way for her to stay afloat. *The Weight of Water* is a startlingly original piece of fiction; most simply a brilliant coming of age story, it also tackles the alienation experienced by many young immigrants. Moving, unsentimental and utterly page-turning, we meet and share the experiences of a remarkable girl who shows us how quiet courage prevails.

Anti-Tech Revolution Aug 15 2021 "There are many people today who see that modern society is heading toward disaster in one form or another, and who moreover recognize technology as the common thread linking the principal dangers that hang over us... The purpose of this book is to show people how to begin thinking in practical, grand-strategic terms about what must be done in order to get our society off the road to destruction that it is now on." --from the Preface In *Anti-Tech Revolution: Why and How*, Kaczynski argues why the rational prediction and control of the development of society is impossible while expounding on the existence of a process fundamental to technological growth that inevitably leads to disaster: a universal process akin to biological natural selection operating autonomously on all dynamic systems and determining the long-term outcome of all significant social developments. Taking a highly logical, fact-based, and intellectually rigorous approach, Kaczynski seamlessly systematizes a vast breadth of knowledge and elegantly reconciles the social sciences with biology to illustrate how technological growth in and of itself necessarily leads to disastrous disruption of global biological systems. Together with this new understanding of social and biological change, and by way of an extensive examination of the dynamics of social movements, Kaczynski argues why there is only one route available to avoid the disaster that technological growth entails: a revolution against technology and industrial society. Through critical and comprehensive analysis of the principles of social revolutions and by carefully developing an exacting theory of successful revolution, Kaczynski offers a practical, rational, and realistic guide for preventing the fast-approaching technology-induced catastrophe. This new second edition (2020) contains various updates and improvements over the first edition (2016), including two new appendices.

Technological Slavery Sep 04 2020 Logical, lucid, and direct, Technological Slavery radically reinvigorates and reforms the intellectual foundations of an age-old and resurgent world-view: "Progress" is a myth. Wild nature and humanity are fundamentally incompatible with technological growth. In Technological Slavery, Kaczynski argues that: (i) the unfolding human and environmental crises are the direct, inevitable result of technology itself; (ii) many of the stresses endured in contemporary life are not normal to the human condition, but unique to technological conditions; (iii) wilderness and human life close to nature are realistic and supreme ideals; and, (iv) a revolution to eliminate modern technology and attain these ideals is necessary and far more achievable than would first appear. Drawing on a broad range of disciplines, Kaczynski weaves together a set of visionary social theories to form a revolutionary perspective on the dynamics of history and the evolution of societies. The result is a comprehensive challenge to the fundamental values and assumptions of the modern technology-driven world, pinning the cause of the rapidly unfolding catastrophe on technology itself, while offering a realistic hope for ultimate recovery. Note: Theodore John Kaczynski does not receive any remuneration for this book.

Anglo-Scottish Literary Relations 1430-1550 Dec 07 2020 This book is a study of Anglo-Scottish literary relations in the later Middle Ages and early Renaissance. It attempts to show how those poets who have frequently been called 'Scottish Chaucerians' (James I, Henryson, Dunbar and Douglas) drew upon English writing. In the best Middle Scots poetry we see an order of invention and technical mastery that is comparable with that of Chaucer's work, and this is sometimes accompanied by shrewd commentary on Chaucer's art. Evidence of such an independent and critical view of Chaucer is strikingly absent in contemporary English poetry, and the book accounts for some of the differences between Northern and Southern poetry in the later Middle Ages. Above all, this study reveals that the poetry of the fifteenth and early sixteenth century in Scotland is a rich and extremely varied body of literature, ranging from the carefully wrought philosophical comedy of 'The Kingis Quair' to the tragic grandeur of Henryson's 'The Testament of Cresseid', from the pointed satires and grotesqueries of Dunbar to Douglas' vigorous and sensitive translation of the Aeneid.

When a successful New Yorker returns to her birthplace in the Adirondack Mountains to escape her publicly tragic life, she begins to find peace for the first time since she was five years old. Hired as a caretaker for an Adirondack Great Camp, she spends over ten years living alone. But Lily Martindale's days as a recluse are plagued by a secret which aggravates her fragile state of mind. On a winter day in the 1990s, deep in the mountains, she opens fire on a military flyover. Lily, once again, is a person of interest in the press, to the public, and now to the FBI—not an enviable position for a hermit. The Adirondack hamlet of Winslow Station is transformed by the unexpected return of its solitary prodigal child. She is driven to confront her own isolation, years of sadness, and her deteriorating health. She also finds something, and someone, she never expected to see again. This well-paced first novel kept me riveted from the poetic opening paragraphs to the unexpected conclusion. The Truth and Legend of Lily Martindale has all the makings of an Adirondack classic." — Bibi Wein, author of The

Way Home: A Wilderness Journey “What to make of Lily Martindale? In this poignant tale of a woman whose heart remains, for both better and worse, in an idyllic Adirondack childhood while she is buffeted by the storms of adolescence and adulthood, Mary Sanders Shartle has given us a deeply moving and penetrating portrait of human memory, longings, and motivations. Shartle’s thorough knowledge of Adirondack social, political, architectural, and natural history allows her to paint a convincing picture of diverse people, their environments, and their interactions, from the ‘Great Camp’ set to natives of remote northern pockets of the park. Will Lily ever retrieve the love and happiness she knew as a child? Perhaps only a raven knows for sure.” — Neal Burdick, coeditor of *The Adirondack Reader: Four Centuries of Adirondack Writing*, 3rd Edition

Hunting the Unabomber Jul 14 2021 The spellbinding account of the most complex and captivating manhunt in American history. "A true-crime masterpiece." -- Booklist (starred review) On April 3, 1996, a team of FBI agents closed in on an isolated cabin in remote Montana, marking the end of the longest and most expensive investigation in FBI history. The cabin's lone inhabitant was a former mathematics prodigy and professor who had abandoned society decades earlier. Few people knew his name, Theodore Kaczynski, but everyone knew the mayhem and death associated with his nickname: the Unabomber. For two decades, Kaczynski had masterminded a campaign of random terror, killing and maiming innocent people through bombs sent in untraceable packages. The FBI task force charged with finding the perpetrator of these horrifying crimes grew to 150 people, yet his identity remained a maddening mystery. Then, in 1995, a "manifesto" from the Unabomber was published in the New York Times and Washington Post, resulting in a cascade of tips--including the one that cracked the case. *Hunting the Unabomber* includes: Exclusive interviews with key law enforcement agents who attempted to track down Kaczynski, correcting the history distorted by earlier films and streaming series Never-before-told stories of inter-agency law enforcement conflicts that changed the course of the investigation An in-depth, behind-the-scenes look at why the hunt for the Unabomber was almost shut down by the FBI New York Times bestselling author and former federal prosecutor Lis Wiehl meticulously reconstructs the white-knuckle, tension-filled hunt to identify and capture the mysterious killer. This is a can't-miss, true crime thriller of the years-long battle of wits between the FBI and the brilliant-but-criminally insane Ted Kaczynski. "A powerful dual narrative of the unfolding investigation and the life story of Ted Kaczynski...The action progresses with drama and nail-biting intensity, the conclusion foregone yet nonetheless compelling. A true-crime masterpiece." -- Booklist (starred review)

John Donne Jan 28 2020 John Donne is now a strong candidate for the most popular Renaissance writer after Shakespeare. What lies behind this longstanding and increasing popularity? Paying tribute to the living vitality of Donne's literary voice, and the kaleidoscope of social detail embedded in his writings, Richard Sugg offers a vibrant engagement with the author's work, life and times. He argues that Donne's fiercely original mind produced remarkable and challenging new images of selfhood, love, friendship, and of a natural world marked by the unstable movement from religion to early science. As this suggests, much of Donne's continuing appeal derives from his ability to look forward to recognisably modern attitudes. At the same time, though, to fully appreciate Donne's life and writing it is necessary to comprehend the strangeness of his social and intellectual world: the peculiar mixture of splendour, violence and suffering which spilled across his path in the streets, theatres and churches of seventeenth-century London, and the attitudes and ideologies expressed within them. Richard Sugg carefully places Donne's poetry and prose in their religious and cultural context, thereby helping the reader to gain a fuller and subtler understanding of his work. He also provides a detailed overview of the current state of critical and theoretical debate. Approachable and lucid, this is a valuable introduction to one of the most enduring and widely-studied Renaissance authors.
